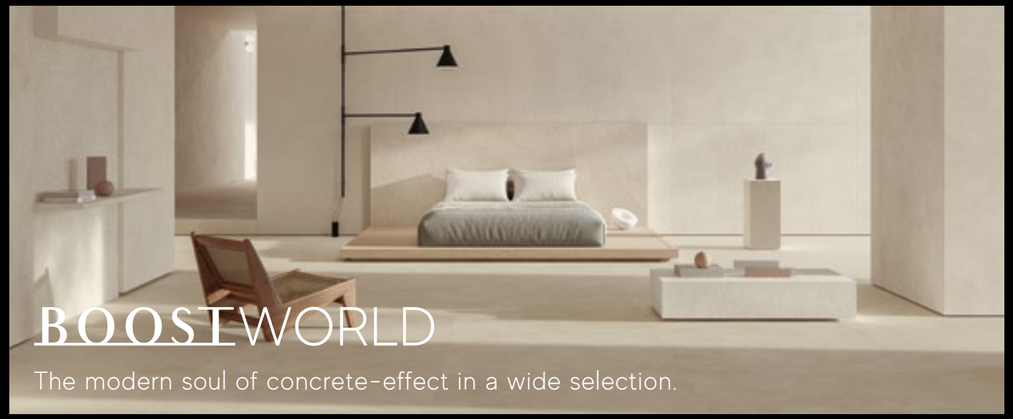
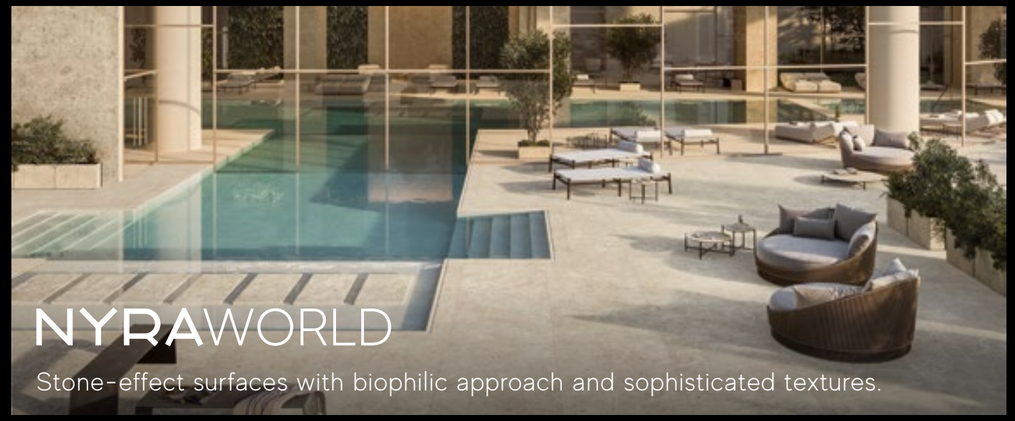
Our Worlds



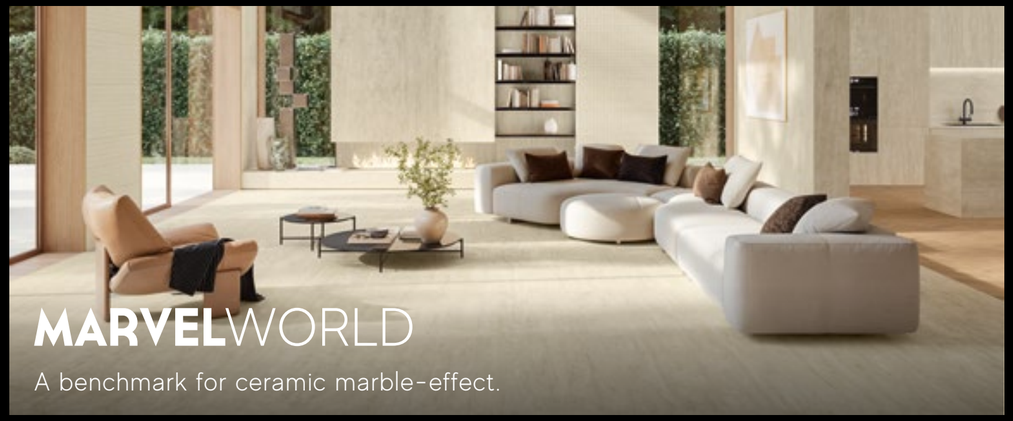
BOOSTWORLD

The modern soul of concrete-effect in a wide selection.



NYRAWORLD

Stone-effect surfaces with biophilic approach and sophisticated textures.

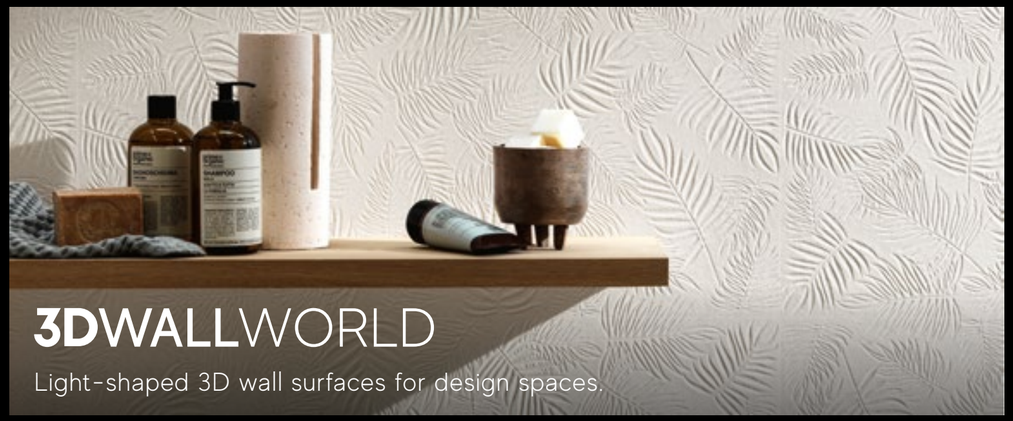


MARVELWORLD

A benchmark for ceramic marble-effect.

LOGWORLD

A renewed and elevated vision of wood.



3DWALLWORLD

Light-shaped 3D wall surfaces for design spaces.

Design awards

Our products compete for top awards and international recognition.

Red Dot Design Award

One of the most prestigious awards in the design sector, with particular reference to the technology sector.

2023 - MARVEL TRAVERTINE DECORS
2023 - MARVEL GALA
2023 - MARVEL X-HAMMERED SURFACE
2022 - BOOST NATURAL
2022 - DIALOGO
2022 - APLOMB
2025 - BOOST EXPRESSION

ADI Design Index

The yearbook held by the Associazione per il Disegno Industriale which each year identifies the best Italian design put into production.

2024 - MARVEL MERAVIGLIA DIAMOND POLISHED
2023 - SENSITECH SURFACE
2022 - 3D WALL CARVE

Technologies

Each of our patented technologies enhances technical and aesthetic qualities.

Sensitech

Sensitech is the high-tech surface for indoor and outdoor settings created by Atlas Concorde Laboratories, patented in Europe, in Russia and the United States. The surface combines high slip resistance performance with tactile softness. With Sensitech, the meaning of surface evolves and takes on a reassuring, pleasant and practical touch, making architectural spaces more comfortable and appealing.

High slip resistance | Soft to the touch

Velvetech

Velvetech is the new technology patented in Italy, with silk-like reflections and a velvety soft hand. The naturalness of the surface is emphasised by areas of different opacity that contribute to the depth of the surface.

Medium reflection surface | Velvety soft hand

NATURA-VEIN™ TECH

Natura Vein Tech is Atlas Plan's technological innovation for marble-effect porcelain slabs with through vein.

Through vein

NATURA-BODY™ TECH

Natura Body Tech is Atlas Plan's technology to reproduce the aesthetics of natural stone both on the surface and in the body of the slab.

Responsibility

Our commitment for the environment.

Circularity

- 100% of cooked and raw waste recovered internally
- 90% recovered waste
- 100% water recovered for internal use
- 100% recyclable packaging materials

Environment, health and safety

- Advanced purification systems, which contribute to the containment of atmospheric emissions
- Reduction of CO_2 emissions due to automated vertical warehouse
- RTO system to reduce harmful emissions and odours
- 0% lead, cadmium, and other dangerous substances in products
- All Atlas Concorde surfaces do not release harmful levels of VOCs (Volatile Organic Compounds)

Reduction & self-production of energy

- Heat recoveries from industrial furnaces
- Efficient methane gas cogeneration plant
- 100% LED light
- Recovery of residual heat energy by tube heat exchangers
- Photovoltaic system producing over 4 GWh annually

Ceramics of Italy

MADE IN ITALY

For Atlas Concorde, being Made in Italy is not just a prestigious certification of style, design, and production excellence, but an identity that involves all aspects of its business. For this reason, we identify with the values expressed by Confindustria Ceramica's ethical code, which guarantee absolute compliance with labor regulations, and with the marks Made in Italy and Ceramics of Italy, which certify the quality of authentic Italian style.

These mosaics allow you to customize a wall by choosing the grout color during the laying phase. The colors presented in these pages are mood suggestions and purely indicative. - Questi mosaici permettono di personalizzare la parete attraverso la scelta del colore dello stucco durante la fase di posa. I colori presentati in queste pagine sono suggerimenti di mood e sono puramente indicativi. - Ces mosaïques permettent de personnaliser le mur moyennant le choix du coloris du joint pendant la phase de pose. Les coloris présentés sur ces pages sont des idées de mood fournies qu'à titre purement indicatif. - Diese Mosaike können zur Personalisierung der Wand mit Fugenmassen in Farben nach Wahl verfugt werden. Die auf diesen Seiten abgebildeten Farben verstehen sich als unverbindliche Beispiele für den erzielbaren Gesamteindruck. - Con estos mosaicos es posible llevar a cabo cualquier idea de personalización de la pared, con la elección del color del estuco durante la fase de colocación. Los colores que les presentamos en estas páginas son sugerencias de estados de ánimo ("mood") y puramente indicativos. Эта мозаика позволяет индивидуализировать стену путем выбора цвета шовной затирки. Цвета, представленные на этих страницах, приведены в качестве примеров и носят ориентировочный характер.

For the best performance of the mosaic, we recommend the use of epoxy mortars (class RG - EN 13888/ISO 13007) or decorative resins-cement, following the manufacturer's instructions. - Al fine di ottenere una resa ottimale del mosaico, è consigliato l'utilizzo di malte epossidiche (classe RG - EN 13888/ISO 13007) o di resine cementizie attendendosi alle indicazioni di utilizzo fornite dal produttore. - Afin d'obtenir un rendu optimal de la mosaïque, nous vous conseillons d'utiliser des mortiers époxy (classe RG - EN 13888/ISO 13007) ou des résines à base de ciment, en suivant les indications d'utilisation fournies par le fabricant. - Um das Mosaik optimal zur Geltung zu bringen, empfehlen wir die Verwendung von Epoxidharzfugenmörtel (Klasse RG - EN 13888/ISO 13007) oder von vergüteten Fugenmörteln unter Beachtung der vom Hersteller angegebenen Verwendungshinweise. - Para obtener un rendimiento óptimo del mosaico, se aconseja utilizar mortero epoxi (clase RG - EN 13888/ISO 13007) o resinas de cemento siguiendo las indicaciones entregadas por el fabricante. - Для наилучшего эстетического результата при укладке мозаики рекомендуется использовать эпоксидные растворы (класс RG - EN 13888/ISO 13007) или полимерцемент, соблюдая инструкции производителя.

ADI DESIGN INDEX 2024

Diamond decor designed by **Zaha Hadid Architects**

Inspired by five elegant marbles.
Calacatta Meraviglia is the protagonist of the collection

Velvetech.
The advanced technology with patent field in Europe for an impeccable smooth touch and semi-opaque reflections.

A distinctive decorative proposal.
The Diamond décor in collaboration with Zaha Hadid Architects has been selected for the prestigious Adi Design Index 2024.

Diamond designed by ZHA consists of six modules in a box. The mosaic covers a height of 2.85 m, but it's possible to lengthen the composition for larger areas by using the Hexagon mosaic, which corresponds to Module A. For an optimal aesthetic result, it's recommended to lay the product keeping the color transition of the tiles in the center of the composition. - Diamond designed by ZHA è composto da sei moduli contenuti in una scatola. Il mosaico ricopre un'altezza di 2.85 mt, ma è possibile allungare la composizione per superfici più estese utilizzando il mosaico Hexagon, che corrisponde al modulo A. Per un risultato estetico ottimale si consiglia di posare il prodotto mantenendo la transizione di colore delle tessere al centro della composizione.

[1] **Marvel Meraviglia Hexagon recalls the hexagonal Module A of Diamond designed by ZHA, which can be combined with to clad larger surfaces. Or use it on its own to give rooms a prestigious touch.** - Marvel Meraviglia Hexagon riprende il modulo esagonale A di Diamond designed by ZHA, a cui si può abbinare per ricoprire superfici più estese. Oppure utilizzare da solo per conferire agli ambienti un tocco di pregio. - Marvel Meraviglia Hexagon reprend le module hexagonal A de Diamond designed by ZHA, auquel elle peut être associée pour recouvrir de plus grandes superficies. Elle peut aussi être utilisée seule pour conférer une touche d'élégance aux espaces. - Marvel Meraviglia Hexagon greift das Sechskantmodul A von Diamond designed by ZHA auf und kann mit diesem kombiniert werden, um ausgedehntere Flächen zu verkleiden. Es kann auch allein verwendet werden, um dem Ambiente besonderes Prestige zu verleihen.- Marvel Meraviglia Hexagon toma el módulo hexagonal A de Diamond diseñado por ZHA, con el cual se puede combinar para cubrir superficies más grandes. O bien, se puede utilizar solo para dar un toque de prestigio a los ambientes.- Marvel Meraviglia Hexagon перенимает шестигранный модуль A у декора Diamond от ZHA и может сочетаться с последним для облицовки более крупных поверхностей. Также может использоваться отдельно для придания интерьерам ноты изысканности.

[1] **The glossy polished finish is suitable for residential or low-traffic commercial floors, where no anti-slip performance is required, and for walls. The polished glossy surface finish, surprisingly brilliant and bright, features slight irregularities typical of natural marble. The extraordinary brilliance and the easy cleaning of the surface are the result of in-depth research aimed at guaranteeing its durability over time. If the product is in direct contact with the outdoors, provide devices for absorbing moisture and dirt to prevent scratches.** - La finitura lappata lucida è indicata per pavimenti residenziali o commerciali poco sollecitati, laddove non siano richieste prestazioni antiscivolo, e per rivestimenti. La finitura lappata lucida offre una superficie sorprendentemente brillante e specchiante, con lievi irregolarità tipiche dei marmi naturali. La straordinaria lucentezza e l'elevata pulibilità della superficie sono frutto di studi approfonditi e accurate ricerche tecniche volte a garantirne la persistenza nel tempo. Se il prodotto è a diretto contatto con l'esterno, prevedere dei dispositivi di assorbimento dell'umidità e della sporcizia per prevenire la formazione di graffi.

[1] **The glossy polished finish is suitable for residential or low-traffic commercial floors, where no anti-slip performance is required, and for walls. The polished glossy surface finish, surprisingly brilliant and bright, features slight irregularities typical of natural marble. The extraordinary brilliance and the easy cleaning of the surface are the result of in-depth research aimed at guaranteeing its durability over time. If the product is in direct contact with the outdoors, provide devices for absorbing moisture and dirt to prevent scratches.** - La finitura lappata lucida è indicata per pavimenti residenziali o commerciali poco sollecitati, laddove non siano richieste prestazioni antiscivolo, e per rivestimenti. La finitura lappata lucida offre una superficie sorprendentemente brillante e specchiante, con lievi irregolarità tipiche dei marmi naturali. La straordinaria lucentezza e l'elevata pulibilità della superficie sono frutto di studi approfonditi e accurate ricerche tecniche volte a garantirne la persistenza nel tempo. Se il prodotto è a diretto contatto con l'esterno, prevedere dei dispositivi di assorbimento dell'umidità e della sporcizia per prevenire la formazione di graffi.

[2] **The silk finish is suitable for residential or low-traffic commercial floors, where no anti-slip performance is required. The surface's shine and great ease of cleaning are the result of in-depth studies and technical research aimed at ensuring its durability over time. If the product is in direct contact with the outdoors, moisture and dirt absorption devices must be used to prevent scratching.** - La finitura silk è indicata per pavimenti residenziali o commerciali poco sollecitati, laddove non siano richieste prestazioni antiscivolo. La lucentezza e l'elevata facilità di pulizia della superficie sono frutto di studi approfonditi e accurate ricerche tecniche volte a garantirne la persistenza nel tempo. Se il prodotto è a diretto contatto con l'esterno, prevedere dei dispositivi di assorbimento dell'umidità e dello sporco per prevenire la formazione di graffi.

[1] **The glossy polished finish is suitable for residential or low-traffic commercial floors, where no anti-slip performance is required, and for walls. The polished glossy surface finish, surprisingly brilliant and bright, features slight irregularities typical of natural marble. The extraordinary brilliance and the easy cleaning of the surface are the result of in-depth research aimed at guaranteeing its durability over time. If the product is in direct contact with the outdoors, provide devices for absorbing moisture and dirt to prevent scratches.** - La finitura lappata lucida è indicata per pavimenti residenziali o commerciali poco sollecitati, laddove non siano richieste prestazioni antiscivolo, e per rivestimenti. La finitura lappata lucida offre una superficie sorprendentemente brillante e specchiante, con lievi irregolarità tipiche dei marmi naturali. La straordinaria lucentezza e l'elevata pulibilità della superficie sono frutto di studi approfonditi e accurate ricerche tecniche volte a garantirne la persistenza nel tempo. Se il prodotto è a diretto contatto con l'esterno, prevedere dei dispositivi di assorbimento dell'umidità e della sporcizia per prevenire la formazione di graffi.

Boost Mix

Inspired by Ceppo di Grè.
The iconic stone of 20th-century Milanese architecture, reinterpreted.

Elegant Personality.
Featuring a distinctive but stylish pebble-like appearance.

Sought-after solution.
One of the most coveted choices for contemporary interior and exterior design.

Boost Stone

Inspired by Pyrenean Limestone.
Timeless sophistication
and modern charm.

Contemporary style.
Create spaces with subtle tones, delicate hues, and minimal color variations.

Perfect micro-details.
Flawlessly replicate the varied surface of the inspirational stone.

Ten Neutral Colors.
Derived from the cement-effect collections of Boost and Boost Pro.

Brave

Inspired by Italian alpine quartzites.
Timeless elegance
and modern sophistication.

The feature of the natural stone.
Distinctive veins, colors and inclusions
inspired by natural stones.

Five Color Variants.
From warm, natural white to deep
anthracite, perfect for modern
design projects.

Indoor and Outdoor Versatility.
Combining the realism of stone-effect
surfaces with the allure of trendy
natural hues.

Nyra

In collaboration with **Alberto Apostoli**

First of his kind.
Nyra gives rise to Nyra World, the Atlas Concorde new stone-effect range.

Exclusive collaboration.
Wellness expertise and unique design by Alberto Apostoli.

Ceramic meets natural materials.
Unique blend of nature-inspired, original design.

First stone with graphic accents.
Ambrosia adds bold graphics for larger formats.

In and out.
Seamless indoor-outdoor design with unmatched continuity.

[2] The Endless Kit contains all the graphics of the product with vein continuity, ensuring that all the numbered faces in the composition can be found in a single box. The number of the graphic – G1, G2, G3, etc – is printed on the side and indicated with an adhesive label placed on the slab. To reconstruct the surface with continuous veins, simply lay the tiles in numerical progression: G1, G2, G3 and so on.

[3] Minor misalignments in the continuity of the veins between different graphics is normal for this type of product.

[2] The Endless Kit contains all the graphics of the product with vein continuity, ensuring that all the numbered faces in the composition can be found in a single box. The number of the graphic – G1, G2, G3, etc – is printed on the side and indicated with an adhesive label placed on the slab. To reconstruct the surface with continuous veins, simply lay the tiles in numerical progression: G1, G2, G3 and so on.

[3] Minor misalignments in the continuity of the veins between different graphics is normal for this type of product.

(1) **The various graphics of the product are distributed randomly in the boxes, without the possibility of choosing between the available patterns.** - All'interno delle casse, le varie grafiche del prodotto sono distribuite in modo casuale, senza possibilità di scelta tra i pattern disponibili. - À l'intérieur delle caisses, les différents graphismes du produit sont distribués en mode aléatoire, sans possibilité de choix entre les motifs disponibles. - Die Kisten enthalten die verschiedenen Grafiken des Artikels nach dem Zufallsprinzip, ohne dass Sie zwischen den einzelnen Motiven wählen können. - En el interior de las cajas, los distintos gráficos de los productos se distribuyen de forma aleatoria, sin que se pueda elegir el patrón disponible. - Рисунки распределены в ящиках в случайном порядке, без возможности выбора из доступных рисунков.

(2) **The Endless Kit contains all the graphics of the product with vein continuity, ensuring that all the numbered faces in the composition can be found in a single box. The number of the graphic – G1, G2, G3, etc – is printed on the side and indicated with an adhesive label placed on the slab. To reconstruct the surface with continuous veins, simply lay the tiles in numerical progression: G1, G2, G3 and so on.** - Il Kit Endless contiene tutte le grafiche del prodotto con continuità di vena; garantisce in un'unica cassa tutte le facce numerate che creano la composizione. Il numero della grafica, indicato come G1, G2, G3, ecc. viene stampato sulla costa del lato 278 e indicato con un adesivo posto sulla lastra. Per ricostruire la superficie con continuità di vena è sufficiente posare le lastre in progressione numerica: G1, G2, G3, ecc. - Le Kit Endless contient tous les graphismes du produit avec la continuité des veinures; il garantit, dans une seule caisse, toutes les faces numérotées qui créent la composition. Le numéro du graphisme, indiqué comme G1, G2, G3, etc. est imprimé sur le bord du côté 278 et indiqué avec un adhésif apposé sur la dalle. Pour reconstruire la surface avec les veinures en continuité, il suffit de poser les dalles en progression numérique: G1, G2, G3, etc. - Kit Endless umfasst alle Grafiken des Produkts mit durchlaufender Äderung und damit alle nummerierten Oberflächen, aus denen sich die Komposition zusammensetzt, garantiert in einer einzigen Kiste. Die Nummer der Grafik, d.h. G1, G2, G3 etc., ist auf der Kante der 278 cm langen Seite aufgedruckt und auch mit einem Klebeetikett auf der Platte angegeben. Um das Gesamtbild mit durchlaufender Äderung zusammenzusetzen, werden die Platten einfach in numerischer Reihenfolge verlegt: G1, G2, G3 usw. - El Kit Endless contiene todas las caras del producto con continuidad de vetas, garantiza contar en una sola caja con todas las caras numeradas que forman la composición. El número del gráfico, indicado como G1, G2, G3, etc., está impreso en el borde del lado 278 y se indica mediante un adhesivo en la losa. Para reconstruir la superficie con continuidad de vetas, basta con colocar las losas en progresión numérica: G1, G2, G3, etc. - Kit Endless – это комплект, который содержит все плиты, необходимые для составления композиции с непрерывным рисунком прожилок. Все плиты пронумерованы и находятся в одном ящике. Номер плиты, обозначенный как G1, G2, G3 и т.д., напечатан на торце грани 278 и указан также на наклейке в углу плиты. Чтобы при облицовке создать рисунок с непрерывающимися прожилками, необходимо просто уложить плиты в последовательности: G1, G2, G3 и т.д.

(3) **Minor misalignments in the continuity of the veins between different graphics is normal for this type of product.** - Eventuali piccoli disallineamenti nella continuità delle venature tra grafiche diverse sono una caratteristica intrinseca di questa tipologia di prodotto. Les éventuels petits désalignements de la continuité des veinures entre différents graphismes sont une caractéristique intrinsèque de cette typologie de produit. - Eventuelle kleine Versätze im Verlauf der Äderungen zwischen unterschiedlichen Grafiken sind charakteristisch für dieses Produkt. - Cualquier pequeño desalineado en la continuidad de las vetas entre diferentes gráficos es una característica intrínseca de este tipo de productos. - Возможные небольшие смещения рисунка прожилок на стыке плит являются характеристикой данного вида изделий.

(4) **The use of a common mild detergent is recommended. Avoid using acidic or alkaline products, waxes, steel wool, or abrasives.** - Si consiglia l'utilizzo di un comune detergente neutro. Evitare l'utilizzo di prodotti acidi o alcalini, ceranti, pagliette di metallo o abrasive. Nous vous conseillons d'utiliser des détergents neutres courants. Éviter l'utilisation de cires et de produits acides ou alcalins, ainsi que les pailles métalliques ou abrasives. - Es empfiehlt sich, ein haushaltsübliches, neutrales Reinigungsmittel zu verwenden. Saure oder alkalische Produkte, Wachs sowie Metallwolle- bzw. Scheuerschwämme sind zu vermeiden. - Recomendamos utilizar un detergente neutro común. Hay que evitar el uso de productos ácidos o alcalinos, ceras y estropajos de metal o abrasivos. - Екомендуется чистить обычным нейтральным моющим средством. Не рекомендуется использовать кислотные, щелочные, восковые средства, а также металлические мочалки.

(5) **Codes A and B are sold separately.** - I codici A e B sono venduti singolarmente. - Les codes A et B sont vendus individuellement - Die Codes A und B sind einzeln erhältlich. - Los códigos A y B se venden individualmente. - Коды A и B продаются по отдельности.

(6) **It can be combined with: Camel and Glow**. - Abbinabile con: Camel e Glow. - Peut être combiné avec: Camel et Glow. - Kombinierbar mit: Camel und Glow. - Combinable con: Camel y Glow. - Совместимы с: Camel и Glow.

(7) **It can be combined with: Haze and Ice**. - Abbinabile con: Haze e Ice. - Peut être combiné avec: Haze et Ice. - Kombinierbar mit: Haze und Ice. - Combinable con: Haze y Ice. - Совместимы с: Haze и Ice.

(8) **The product is composed of graphics with vein continuity, but are distributed randomly in the boxes, without the possibility of choosing between the available patterns.** - Il prodotto è composto da grafiche con continuità di vena, ma all'interno delle casse queste sono distribuite in modo casuale, senza possibilità di scelta tra i pattern disponibili. - Le produit consiste en des graphismes avec une continuité de la veine, mais dans les boîtes, ceux-ci sont distribués de manière aléatoire, sans choix de motifs. - Die verschiedenen Grafiken des Produkts sind durchlaufend gestaltet, jedoch nach dem Zufallsprinzip in den Kisten enthalten. Daher ist es nicht möglich, zwischen den einzelnen Mustern zu wählen. - El producto consiste en gráficos con continuidad de vetas, pero dentro de las cajas está distribuido de forma aleatoria y no se pueden elegir los patrones. - Это изделие состоит из рисунков с непрерывными прожилками, но они распределены в ящиках в случайном порядке, без возможности выбора из доступных рисунков.

♦ **Graphic pattern. Misalignments in the continuity between different patterns is normal for this type of product.** - Decoro grafico. Eventuali disallineamenti nella continuità tra grafiche diverse sono una caratteristica intrinseca di questa tipologia di prodotto. - Les éventuels petits désalignements de la continuité entre différents graphismes sont une caractéristique intrinsèque de cette typologie de produit. - Abweichungen in der Mustergeometrie zwischen einem Teil und einem anderen sind ein Merkmal dieses Produkts. Las desalineaciones en la geometría del diseño entre una pieza y otra son un rasgo característico de este producto. - несовпадение геометрии рисунка на стыке плит является характеристикой данного вида изделий.

The decoration can only be laid on the wall - Il decoro si può posare solo a rivestimento - Décor uniquement mural - Das Dekor kann nur an der Wand verlegt werden - La decoración se puede colocar únicamente en paredes - Декор может быть уложен только на стену.

NATURA-VEIN™ TECH

Natura-Vein™ Tech is the technology from the Concorde Group that makes it possible to recreate the typical veining of a natural material such as marble in porcelain stoneware slabs at an industrial level.
This exclusive technology can also be applied to Atlas Plan slabs with a thickness of 20 mm.

Natura-Vein™ Tech è la tecnologia del Gruppo Concorde che permette di riprodurre nello spessore delle lastre in gres porcellanato la venatura tipica di un materiale naturale come il marmo. Una tecnologia esclusiva che può essere applicata alle lastre Atlas Plan con spessore di 20 mm.

NATURA-BODY™ TECH

Natura-Body™ Tech is the is the technology from the Concorde Group that allows the aesthetics of natural stone to be reproduced across both the surface and body of the slab.
This exclusive technology can also be applied to Atlas Plan slabs with a thickness of 20 mm and 12 mm.

Natura-Body™ Tech è la tecnologia del Gruppo Concorde che permette di riprodurre l'estetica della pietra naturale sia in superficie che nel corpo della lastra. Una tecnologia esclusiva che può essere applicata alle lastre Atlas Plan con spessore di 20 mm e 12 mm.

Notes

atlasPLAN

CAUTION

Atlas Plan is in no way liable for "improper" use of the material, which is why it recommends to:

- Prevent shocks at the most exposed points such as corners and edges, both with and without ledge;
- Avoid the use of metal or abrasive straws;
- Refrain from using knives with ceramic blades as the hardness of the two materials is very similar;
- Provide protection systems, such as wooden and/or plastic cutting boards, when cutting foodstuffs on surfaces having a dark colour and/or a Polished or Satin finish;
- Precautiously protect the surface from direct contact with hot objects (e.g. frying pans, pots, coffee pots,etc. ...) using trivets.

Note: for the repair of shallow surface scratches in the various finishes, please refer to your Atlas Plan contact person directly.
Atlas Plan slabs must be cut in accordance with the instructions in the technical manual; any breakage due to a cut made other than specified will not be the responsibility of Atlas Plan.
The Technical Manual illustrates how to properly clean any type of stain that can be detected on an Atlas Plan surface; use the indicated products in case extraordinary cleaning is required.
It is understood that Atlas Plan cannot be held liable for events, damage or defects due to careless cleaning and maintenance.

EXCLUSIONS FROM THE 25-YEAR LIMITED WARRANTY FOR SLABS USED TO MANUFACTURE THE PRODUCT PURCHASED (KITCHEN TOPS AND BACKSPLASHES; WASHBASINS AND VANITY TOPS; TABLES) FOR DOMESTIC OR RESIDENTIAL USE
1. Damage caused by abuse or misuse of the products purchased, including but not limited to damage caused by improper use or accidents, following exposure of the product to abnormal physical conditions (such as strong impacts), aggressive chemicals, staining substances (such as ink and markers), corrosion, structural movements or natural disasters. Remember that contact with hydrofluoric acid results in immediate and irreversible damage.
2. Any type of damage directly or indirectly caused by actions, operations or works carried out by third parties. By way of non-limiting example: problems caused by incorrect processing of the product, improper installation or handling methods of the original product, cracks on the surface of the product purchased after its installation, etc...
3. Products that have been moved from their original place of installation.
4. The reactions and appearance of joints or seams, adhesives, sealants and all other accessories.
5. Damage caused by appliances installed, used or subject to improper maintenance.
6. Imperfections caused by natural wear and tear due to everyday use, such as stains, scratches, water marks and burns.
7. When choosing a colour or finish, consider that the samples only give a approximate indication of the design, pattern, aspect, colour and finish. There is no guarantee that the samples are an exact reproduction of the Atlas Plan slab. They may differ slightly from the actual installed product.
8. Opinions based on the customer's personal preferences, leading them to change their mind about the colour or general appearance, or other aesthetic opinions following manufacture or installation of the product.
9. Use of 162x324 cm slabs for commercial applications including, but not limited to, installation in shops, offices and other commercial establishments.
10. Purchased products in which the factory-applied surface finish has been altered in some way.
11. Defects already visible at the time of processing or installation of products made from 162x324 cm Atlas Plan slabs.
12. Transport, processing, assembly and/or disassembly costs for the repair or re-installation of the product purchased.
13. Additional repairs or modifications required for the new installation (plumbing, electricity, renovation work, etc.).
14. Repairs carried out without prior verification by Atlas Plan.
15. Stains caused by direct contact with aggressive chemical solutions or scratches caused by the use of rough or steel wire sponges to clean the product purchased, or resulting from any other improper use of abrasive products in violation of the Precautions for Use and the cleaning and maintenance instructions indicated in the Atlas Plan Technical Manual (available at www.atlasplan.com/en/).
16. Anything not expressly mentioned in this guarantee.
The 25-year Limited Warranty will not be transferable and will be applied only to the slabs used in the manufacture of the product purchased, for domestic or residential use, such as kitchen tops and backsplashes, washbasins, wall units and tables. This warranty will not be valid if the full payment of the product purchased has not been made.
The processing workshop and the installer are responsible for testing Atlas Plan slabs prior to the production and installation of the products made from the slabs.
No other express or implicit warranty included merchantability or suitability for a particular purpose is issued. Except as set out herein, Atlas Plan disclaims all contractual and non-contractual liability for any direct, incidental or consequential loss or damage resulting from the use or inability to use the product purchased made from Atlas Plan slabs.
No one except Atlas Plan shall have the right or authorisation to make any promises, representations or warranties of any kind in relation to their products.

ATTENZIONE

Atlas Plan non si ritiene in alcun modo responsabile per utilizzo "improprio" del materiale, ragione per la quale raccomanda di:

- Prevenire dagli urti nei punti più esposti tipo angoli e bordi, sia con che senza veletta;
- Evitare l'utilizzo di pagliette metalliche o abrasive;
- Non utilizzare dei coltelli con lama in ceramica in quanto la durezza dei due materiali è molto simile;
- Predisporre sistemi di protezione, tipo taglieri in legno e/o plastica, quando si tagliano alimenti su piani caratterizzati da un colore scuro e/o da una finitura Polished o Satin;
- Proteggere precauzionalmente la superficie dal contatto diretto con oggetti caldi (tipo padelle, pentole, caffettiere, ...) predisponendo l'utilizzo di sottopentole.

Nota: per la riparazione di graffi superficiali non profondi nelle varie finiture, rivolgersi direttamente al funzionario Atlas Plan.
Le lastre Atlas Plan vanno tagliate seguendo le istruzioni del manuale tecnico, qualunque rottura dovuta a un taglio eseguito in modo non indicato non sarà ritenuta di responsabilità di Atlas Plan.
Il Manuale tecnico illustra come pulire correttamente qualunque tipo di macchia che si può rilevare su una superficie Atlas Plan, utilizzare i prodotti indicati in caso sia necessario un intervento di pulizia straordinaria.
Resta inteso che Atlas Plan non potrà essere ritenuta responsabile per eventi, danni o difetti dovuti a negligente pulizia e manutenzione.

ESCLUSIONI DELLA GARANZIA LIMITATA DI 25 ANNI PER LE LASTRE UTILIZZATE PER LA FABBRICAZIONE DEL PRODOTTO ACQUISTATO (TOP CUCINA E BACKSPLASH; LAVABI E VANITIES; TAVOLI) PER USO DOMESTICO O RESIDENZIALE
1. Danni causati da abuso o uso improprio dei prodotti acquistati, inclusi ma non limitati a danni causati da uso improprio o incidenti, a seguito dell'esposizione del prodotto a condizioni fisiche anomale (come forti urti), sostanze chimiche aggressive, sostanze macchianti (come inchiostro e pennarelli), corrosione, movimenti strutturali o disastri naturali. Si ricorda che il contatto con l'acido fluoridrico provoca danni immediati e irreversibili.
2. Qualsiasi tipo di danno causato direttamente o indirettamente da azioni, operazioni o lavori eseguiti da terzi. A titolo esemplificativo e non esaustivo: problemi causati da errata lavorazione del prodotto, metodi di installazione o manipolazione impropri del prodotto originale, crepe sulla superficie del prodotto acquistato dopo la sua installazione, ecc.
3. Prodotti che sono stati spostati dal luogo di installazione originale.
4. Le reazioni e l'aspetto di giunti o cuciture, adesivi, sigillanti e tutti gli altri accessori.
5. Danni causati da apparecchi installati, utilizzati o soggetti a cattiva manutenzione.
6. Imperfezioni causate dall'usura naturale dovuta all'uso quotidiano, come macchie, graffi, segni d'acqua e ustioni.
7. Nella scelta di un colore o di una finitura, va tenuto presente che i campioni forniscono solo un'indicazione generale del design, del motivo, dell'estetica, del colore e della finitura. Non vi è alcuna garanzia che i campioni siano una replica esatta della lastra Atlas Plan. Potrebbero differire leggermente dal prodotto effettivamente installato.
8. Opinioni basate sulle preferenze personali del cliente, che lo portano a cambiare idea sul colore o sull'aspetto generale, o altre opinioni estetiche successive alla fabbricazione o all'installazione del prodotto.
9. Utilizzo di lastre 162x324 cm per applicazioni commerciali inclusa, a titolo esemplificativo ma non esaustivo, installazione in negozi, uffici e altri esercizi commerciali.
10. Prodotti acquistati in cui la finitura superficiale applicata in fabbrica è stata in qualche modo alterata.
11. Difetti già visibili al momento della lavorazione o posa in opera di prodotti realizzati con lastre 162x324 cm. Piano Atlante.
12. Costi di trasporto, lavorazione, montaggio e/o smontaggio per la riparazione o reinstallazione del prodotto acquistato.
13. Ulteriori riparazioni o modifiche necessarie per la nuova installazione (idraulica, elettrica, lavori di ristrutturazione, ecc.).
14. Riparazioni eseguite senza previa verifica da parte di Atlas Plan.
15. Macchie causate dal contatto diretto con soluzioni chimiche aggressive o graffi causati dall'uso di spugne ruvide o di filo d'acciaio per pulire il prodotto acquistato, o derivanti da qualsiasi altro uso improprio di prodotti abrasivi in violazione delle Precauzioni d'uso e della pulizia e istruzioni di manutenzione indicate nel Manuale Tecnico Atlas Plan (disponibile su www.atlasplan.com).
16. Quanto non espressamente menzionato nella presente garanzia.
La Garanzia Limitata di 25 anni non sarà trasferibile e si applicherà solo alle lastre utilizzate nella fabbricazione del prodotto acquistato, per uso domestico o residenziale, come piani cucina e alzatine, lavabi, mobili e tavoli. Tale garanzia non sarà valida se non sarà stato effettuato il pagamento integrale del prodotto acquistato.
Il laboratorio di lavorazione e l'installatore sono responsabili del collaudo delle lastre Atlas Plan prima della realizzazione e posa in opera dei manufatti realizzati con le lastre.
Non viene rilasciata alcuna altra garanzia esplicita o implicita, inclusa la commerciabilità o l'idoneità per uno scopo particolare. Ad eccezione di quanto stabilito nel presente documento, Atlas Plan declina ogni responsabilità contrattuale ed extracontrattuale per qualsiasi perdita o danno diretto, incidentale o consequenziale derivante dall'uso o dall'impossibilità di utilizzare il prodotto acquistato realizzato con lastre Atlas Plan.
Nessuno, ad eccezione di Atlas Plan, avrà il diritto o l'autorizzazione a fare promesse, dichiarazioni o garanzie di qualsiasi tipo in relazione ai propri prodotti.

Sinks & Tables cleaning and maintenance

FR-DE-ES-RU

SINKS

SANITIZING

Porcelain tiles surfaces are extremely easy to sanitize, owing to the physical and mechanical features of this material. Indeed, since they are produced at extremely high temperatures, they prove entirely poreless, which prevents mold, mildew and bacteria from spreading. This means sanitizing products or products with a specific concentration of chemicals capable of eradicating germs and bacteria from surfaces can easily be used, for optimum efficiency and without worrying about damaging the material itself.

ROUTINE CLEANING

For routine cleaning, simply use a damp sponge or a microfiber cloth with hot water and ordinary neutral detergent* then wipe dry with a soft cloth. To remove dirt built up in the corners, we recommend you rub with a nonabrasive soft bristle brush.
Avoid using:
1. Products with waxing, restoring, polishing, brightening properties;
2. Products containing hydrofluoric acid and its derivatives;
3. Metal wire pads (iron and steel pads) or excessively abrasive pads.

CAUTION: Porcelain tiles do not require the application of waxes or detergents with polishing additives, even when the surface is glossy/lapped.

*such as Clean Universal made by Faber Chimica or Fila Clean&Shine for the Italian market - Fila Cleanall for the US market - Fila Brio for all other markets.

EXTRAORDINARY CLEANING

In the event of tough stains, which cannot be removed during routine cleaning operations, we suggest the use of alkaline detergents* for coffee, fruit juice, wine, ink stains and the like, acidic detergents** in the event of limescale residue (or rust), use specific detergents to remove silicone sealant residue***

*such as Clean Degreaser - Deep Degreaser made by Faber Chimica or Fila Powerclean for the Italian market - Fila Hobby for other markets.
**such as Clean Limescale - Tile Cleaner made by Faber Chimica or Fila Deepclean for the Italian market - Fila Via Bagno for other markets.
***such as Epoxy Cleaner made by Faber Chimica or Fila Zerosil.

STEEL SURFACES

Stainless steel is an extremely strong material and is not subject to the corrosive action of oxidation. However, specific products should be used for cleaning it.
In addition, to avoid damaging the surface, do not use:
1. sponges or scourers that could cause irreversible scratches and abrasions;
2. aggressive chemicals;
3. cleaning products based on ammonia, bleach or chlorine.

LACQUERED SURFACES

Daily cleaning and maintenance of the lacquered surfaces of the drawer unit.
To maintain lacquered surfaces for as long as possible and in the best possible condition, proceed as follows:
1. Treat the stain promptly, allowing it to remain in contact with the surface for as little time as possible.
2. Only use a moistened microfibre cloth, white if possible. Do not use sponges or rags that could scratch the surface.
3. Use a NON-abrasive, neutral liquid soap solution. Marseille soap is particularly suitable. Simply dilute a few flakes in a bowl with lukewarm water, lightly dampen the cloth and wipe the surface.
4. After wiping, it is best to rinse and dry quickly, taking care to use a dry cloth different from the one used for cleaning. Air drying is not recommended because halos or traces of water may remain.
5. Do not use organic solvents such as acetone and alcohol, do not use detergents containing strong acids, kitchen detergents and substances containing ammonia, trichloroethylene and bleach.

LAVABI

IGIENIZZAZIONE

Le superfici in gres porcellanato sono estremamente facili da igienizzare, grazie alle caratteristiche fisico-meccaniche di questo materiale. Infatti, essendo prodotta ad altissime temperature, risulta totalmente priva di pori, fatto che impedisce a muffe e batteri di proliferare. È possibile utilizzare pertanto senza problemi prodotti igienizzanti ossia con una determinata concentrazione di sostanze in grado di eliminare germi e batteri dalle superfici, con la massima efficacia e senza temere di rovinare il materiale stesso.

PULIZIA ORDINARIA

Per la pulizia quotidiana è sufficiente utilizzare una spugna inumidita o un panno in microfibra con acqua calda e un comune detergente neutro* asciugando con un panno morbido. Per la rimozione di sporco accumulatosi negli angoli si suggerisce di strofinare con uno spazzolino con setole morbide non abrasive.
Evitare l'utilizzo di:
1. Prodotti con caratteristiche ceranti, ravvivanti, lucidanti, brillantanti;
2. Prodotti che contengono acido fluoridrico e suoi derivati;
3. Pagliette di metallo (spugnette di ferro e acciaio) o eccessivamente abrasive.

ATTENZIONE: Il gres porcellanato non richiede l'applicazione di cere o di detergenti con additivi lucidanti anche quando ha una superficie lucida/lappata.

*tipo Clean Universal della Faber Chimica oppure Fila Clean&Shine per mercato IT - Fila Cleanall per mercato USA - Fila Brio per tutti gli altri mercati.

PULIZIA STRAORDINARIA

Nel caso di macchie ostinate, non rimovibili con la pulizia ordinaria, si suggerisce di utilizzare detergenti a base alcalina* per caffè, succhi di frutta, vino, inchiostro, ed etc.,
detergenti a base acida** nel caso di residui di calcare (o ruggine) utilizzare detergenti specifici per la rimozione di residui di sigillanti siliconici***

*tipo Clean Degreaser - Deep Degreaser della Faber Chimica oppure Fila Powerclean per mercato IT - Fila Hobby per gli altri mercati.
**tipo Clean Limescale - Tile Cleaner della Faber Chimica oppure Fila Deepclean per il mercato IT - Fila Via Bagno per gli altri mercati.
***tipo Epoxy Cleaner della Faber Chimica oppure Fila Zerosil.

SUPERFICI IN ACCIAIO

L'acciaio inox è un materiale estremamente resistente e non è soggetto all'azione corrosiva dell'ossidazione.
Tuttavia per la pulizia è opportuno adoperare prodotti specifici.
Inoltre per evitare il danneggiamento della superficie non utilizzare:
1. spugne o pagliette metalliche che potrebbero generare graffi ed abrasioni irreversibili;
2. sostanze chimiche aggressive;
3. prodotti per la pulizia a base di ammoniaca, candeggina o cloro.

SUPERFICI LACCATE

Pulizia e manutenzione quotidiana delle superfici laccate della cassettiera. Per conservare le superfici laccate per il maggior tempo e nella migliore condizione possibile, è necessario rispettare e seguire i seguenti punti:
1. Agire tempestivamente sulla macchia, lasciando che questa rimanga il minor tempo possibile a contatto con la superficie;
2. Utilizzare esclusivamente un panno in microfibra inumidito, possibilmente bianco. Non utilizzare spugne o stracci che potrebbero graffiare la superficie;
3. Utilizzare una soluzione di sapone liquido neutro NON abrasivo.
Particolarmente indicato è il Sapone di Marsiglia, sarà sufficiente diluire alcune scaglie in una bacinella d'acqua tiepida, bagnare leggermente il panno e passarlo sulla superficie;
4. Dopo aver passato il panno, è bene procedere con le operazioni di risciacquo e asciugatura in maniera rapida, avendo cura di usare un panno asciutto diverso da quello utilizzato per la pulizia. L'asciugatura all'aria è sconsigliata perché potrebbero rimanere aloni o tracce di acqua; Non usare solventi organici come acetone ed alcool, non usare detergenti contenenti acidi forti, detergenti per cucina e sostanze contenenti ammoniaca, trielina e candeggina.

TABLES

Iron and steel table structures are designed to ensure durability and strength over time. To keep them in excellent condition and prevent premature wear, it is essential to follow a few simple maintenance and cleaning guidelines

ROUTINE CLEANING

For daily cleaning, simply:
Use a soft microfiber cloth or a damp sponge with lukewarm water and a neutral detergent. Always dry with a soft, dry cloth to prevent streaks or limescale buildup. Avoid using:
Abrasive sponges or metal scouring pads, as they can scratch the surface.
Products containing ammonia, bleach, chlorine, or aggressive solvents, which may damage the finish. Oily or wax-based cleaners that leave residues and alter the metal's appearance.

DEEP CLEANING

For stubborn dirt, grease stains, or difficult marks:
Grease or oil residues: Use a neutral degreasing cleaner, apply with a soft cloth, and rinse with clean water.
Limescale stains: For limescale deposits, a mild solution of water and white vinegar can be applied with a cloth and rinsed off immediately. Rust spots on painted iron: If small rust spots appear, gently treat them with a non-abrasive sponge and a specific anti-rust product, being careful not to damage the protective paint.

PREVENTION AND MAINTENANCE

Avoid prolonged exposure to moisture: In outdoor environments, always dry the surfaces after rain and ensure the support area does not retain water. For painted iron structures: Regularly check the surface for any scratches and restore the protective paint if needed. For stainless steel structures: Avoid prolonged contact with non-stainless steel objects to prevent galvanic corrosion.

TAVOLI

Le strutture dei tavoli in ferro e acciaio sono progettate per garantire durata e resistenza nel tempo. Per mantenerle in condizioni eccellenti e prevenire un'usura prematura, è essenziale seguire alcune semplici linee guida per la manutenzione e la pulizia.

PULIZIA DI ROUTINE

Per la pulizia quotidiana, è sufficiente:
Utilizzare un panno morbido in microfibra o una spugna umida con acqua tiepida e un detergente neutro. Asciugare sempre con un panno morbido e asciutto per evitare aloni o accumuli di calcare. Evitare l'uso di:
Spugne abrasive o pagliette metalliche, che possono graffiare la superficie. Prodotti contenenti ammoniaca, candeggina, cloro o solventi aggressivi, che possono danneggiare la finitura. Detergenti oleosi o a base di cera, che lasciano residui e alterano l'aspetto del metallo.

PULIZIA PROFONDA

Per sporco ostinato, macchie di grasso o segni difficili:
Residui di grasso o olio: Usare un detergente sgrassante neutro, applicare con un panno morbido e risciacquare con acqua pulita.
Macchie di calcare: Per depositi di calcare, si può applicare una soluzione delicata di acqua e aceto bianco con un panno e risciacquare immediatamente. Macchie di ruggine su ferro verniciato: Se compaiono piccole macchie di ruggine, trattarle delicatamente con una spugna non abrasiva e un prodotto specifico antiruggine, facendo attenzione a non danneggiare la vernice protettiva.

PREVENZIONE E MANUTENZIONE

Evitare l'esposizione prolungata all'umidità: In ambienti esterni, asciugare sempre le superfici dopo la pioggia e assicurarsi che l'area di appoggio non trattenga acqua. Per strutture in ferro verniciato: Controllare periodicamente la superficie per eventuali graffi e ripristinare la vernice protettiva se necessario. Per strutture in acciaio inossidabile: Evitare il contatto prolungato con oggetti non in acciaio inox per prevenire la corrosione galvanica.

Notes

CAUTION

Avoid accidental shocks that could result in chipping or irreversible damage. In the event of breakage, check that the structural parts are not damaged and, if necessary, discard the item.
Avoid any improper use of the items and their components. Some removable parts could be used as blunt objects.
Be careful: sharp edges and possible razor-sharp surfaces.

ATTENZIONE

Evitare urti accidentali che potrebbero provocare sbeccature o lesioni non ripristinabili. In presenza di rotture verificare che le parti strutturali non siano compromesse e nel caso mettere fuori utilizzo l'oggetto.
Evitare qualsiasi uso improprio degli articoli e dei loro componenti. Alcune parti removibili potrebbero essere utilizzate come oggetti contundenti.
Prestare attenzione: spigoli acuminati e possibile presenza di superfici taglienti.

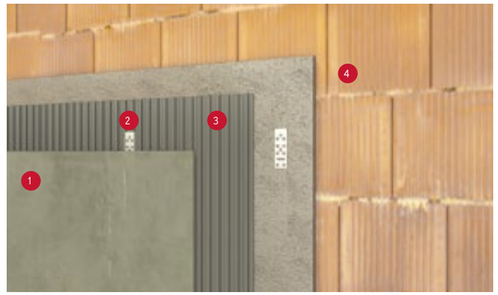
Bonded facades

On plaster

Suitable thicknesses
∓ 6 mm
∓ 9 mm
∓ 12 mm

1. Stoneware cladding
2. Safety hook
3. Highly deformable adhesive
4. Masonry



BONDED FACADES ON PLASTER

Porcelain panels are bonded directly to the outer plaster layer of the wall face using the double spreading method with the proper adhesive depending on the nature of the substrate, environmental conditions, and panel size. It is advisable to place metal hooks as an additional safety restraint, which will remain hidden behind the slab.
These hooks are then mechanically attached to the wall.

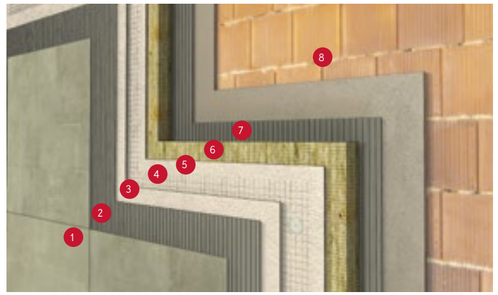
FACCIATE INCOLLATE SU INTONACO

I pannelli in gres vengono incollati direttamente allo strato di intonaco esterno del paramento murario, adottando il metodo della doppia spalmatura con idoneo adesivo in funzione alla natura del sottofondo, delle condizioni ambientali e del formato del pannello. È consigliabile disporre ganci metallici, come ulteriore ritegno di sicurezza, che rimarranno nascosti dietro la lastra preventivamente lavorata.
Tali ganci sono poi fissati meccanicamente alla parete.

On thermal coat

Suitable thicknesses
∓ 6 mm [1]

1. Stoneware cladding
2. Highly deformable adhesive
3. Structural plaster
4. Fiber glass mesh
5. Structural render
6. Insulating panel
7. Adhesive
8. Masonry



BONDED FACADES ON THERMAL COAT

External vertical cladding system made by bonding the ceramic slabs to the insulating layer using the double spreading method with the proper adhesive depending on the nature of the substrate, environmental conditions, and panel size. Light colors with a solar reflectance index (SR) greater than 20% are recommended.

FACCIATE INCOLLATE SU CAPPOTTO TERMICO

Sistema di rivestimento verticale esterno realizzato incollando le lastre ceramiche allo strato di isolante, adottando il metodo della doppia spalmatura con idoneo adesivo in funzione alla natura del sottofondo, delle condizioni ambientali e del formato del pannello.
Sono da privilegiare colori chiari con indice di riflettanza solare (SR) maggiore del 20%.

[1] **However, we do not exclude the possibility of using thicker, larger slabs on insulating layers after further evaluation at the design stage or on-site surveys in the case of work on existing surfaces.** - Non si esclude comunque la possibilità di incollare su isolante in facciata lastre di spessore e formato maggiori previa ulteriori valutazioni in fase di progetto o rilievi in sito in caso di interventi su esistente.

VENTILATED FACADES
TECHNICAL SPECIFICATIONS

Ventilated facades*

With visible mechanical hooks

Suitable thicknesses
± 6 mm
± 9 mm
± 12 mm

1. Stoneware cladding
2. Clip hook
3. Insulating panel
4. Mullion
5. Brackets
6. Masonry

VENTILATED FACADES WITH VISIBLE MECHANICAL HOOKS

The attachment of the slabs is visible and done with steel clips, possibly painted in a color similar to the facing. The metal structure of the system consists of vertical mullions and brackets anchored to the wall of the building by appropriately sized dowels. The coupling system between bracket and upright ensures compliance with the designed geometric constraints while also allowing for minor adjustment during installation.

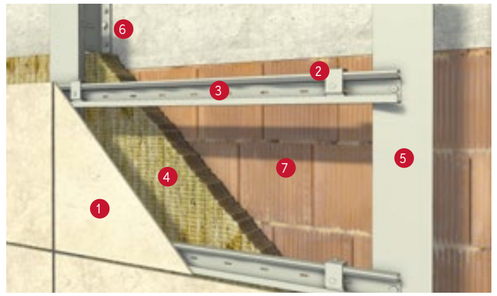
FACCIATE VENTILATE CON AGGANCI A VISTA MECCANICI

L'aggancio delle lastre è visibile e realizzato con clips di acciaio, eventualmente verniciate con un colore simile al paramento.
La struttura metallica del sistema è composta da montanti verticali e staffe, ancorate alla parete portante dell'edificio mediante tasselli opportunamente dimensionati. Il sistema di aggancio tra staffa e montante permette di rispettare i vincoli geometrici progettati garantendo piccoli aggiustamenti in fase di posa.

With invisible mechanical hooks

Suitable thicknesses
± 9 mm
± 12 mm
± 20 mm

1. Stoneware cladding
2. Fasteners
3. Horizontal profile
4. Insulating panel
5. Mullion
6. Brackets
7. Masonry



VENTILATED FACADES WITH INVISIBLE MECHANICAL HOOKS

The attachment is concealed on the back of the slab by means of special steel inserts that fit into previously-made holes.
The metal structure of the system consists of vertical mullions, horizontal beams, and brackets anchored to the wall of the building by appropriately sized dowels. The coupling system between bracket and upright ensures compliance with the designed geometric constraints while also allowing for minor adjustments during installation.

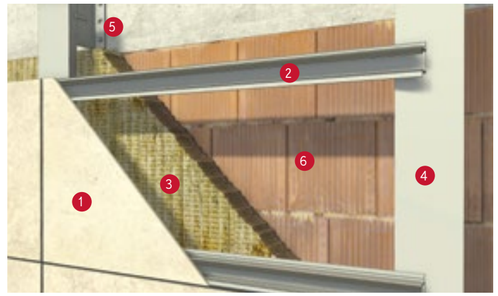
FACCIATE VENTILATE CON AGGANCI A SCOMPARSA MECCANICI

L'aggancio è occulto sul retro della lastra mediante speciali inserti di acciaio che si inseriscono in fori sottosquadro, precedentemente realizzati meccanicamente. La struttura metallica del sistema è composta da montanti verticali, correnti orizzontali e staffe, ancorate alla parete portante dell'edificio mediante tasselli opportunamente dimensionati. Il sistema di aggancio tra staffa e montante permette di rispettare i vincoli geometrici progettati garantendo piccoli aggiustamenti in fase di posa.

With invisible chemical-mechanical hooks

Suitable thicknesses
± 6 mm
± 9 mm
± 12 mm

1. Stoneware cladding
2. Horizontal profile
3. Insulating panel
4. Mullion
5. Brackets
6. Masonry



VENTILATED FACADES WITH INVISIBLE CHEMICAL-MECHANICAL HOOKS

For slabs less than 9 mm thick, the attachment system is not only mechanical but also chemical. Depending on the case, the bonding can be continuous and applied to a backing layer or directly to the metal profiles of the structure. The hybrid nature of the attachment thus provides greater safety than single-attachment techniques.

FACCIATE VENTILATE CON AGGANCI A SCOMPARSA CHIMICO-MECCANICI

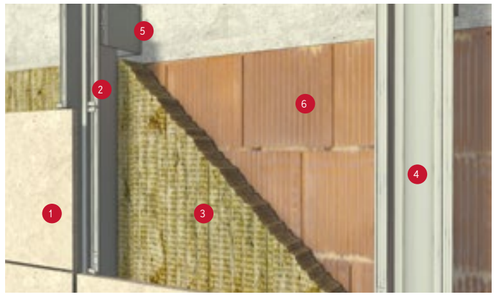
Per lastre di spessore inferiore a 9 mm, il sistema di aggancio non sarà esclusivamente meccanico ma anche chimico. A seconda dei casi l'incollaggio può essere continuo e applicato ad uno strato di supporto oppure direttamente ai profili metallici della struttura. La natura ibrida dell'aggancio garantisce così maggior sicurezza rispetto ad agganci con tecnica di fissaggio singola.

FR-DE-ES-RU

With invisible hooks for slabs with incisions (kerf)

Suitable thicknesses
± 20 mm

1. Stoneware cladding
2. Clip hook
3. Insulating panel
4. Mullion
5. Brackets
6. Masonry



VENTILATED FACADES WITH INVISIBLE HOOKS FOR SLABS WITH INCISIONS (KERF)

For 20-mm-thick slabs, the concealed attachment system consists of clips inserted into an incision on the edge of the slabs, previously cut into the thickness along the parallel horizontal sides with respect to the orientation of the installation. The structure can be the same as the systems with visible fasteners.

FACCIATE VENTILATE CON AGGANCI A SCOMPARSA PER LASTRE INTAGLIATE (KERF)

Per lastre di spessore 20 mm il sistema di aggancio occulto è costituito da clips inserite in una incisione sulla costa delle lastre, preventivamente incise nello spessore lungo i lati paralleli orizzontali rispetto all'orientamento dell'installazione.
La struttura può essere la stessa dei sistemi con aggancio a vista.

ESL
مختبر الإمارات للسلامة
EMIRATES SAFETY LABORATORY

Proudly Attested by ESL
ensuring a safer and sustainable future together

* **Technological exterior cladding systems consisting of a series of layers anchored to the building walls by a metal structure. A layer of thermal and acoustic insulation is usually applied directly on the wall, and then porcelain tile cladding is added externally. A hollow space is created between the two layers to ensure the breathability of the facade through continuous ventilation.** - Sistemi tecnologici di rivestimento esterno costituiti da una serie di strati ancorati alle pareti dell'edificio mediante una struttura metallica. A contatto con la parete in genere è applicato uno strato di isolante termico ed acustico e più esternamente il rivestimento in gres porcellanato. Tra i due strati si crea un'intercapedine vuota che garantisce traspirazione della facciata mediante ventilazione continua.

Safety Requirements

Processing operations such as cutting, grinding and polishing may generate respirable crystalline silica dust.

- **Do not handle until all safety precautions have been read, understood and implemented.**
- **Always use wet methods (apply water) during all fabrication and processing.**
- **Avoid generating airborne dust, especially without appropriate respiratory protective equipment and adequate air filtration and ventilation systems, which depend on the specific workplace conditions. Air monitoring should be conducted to ensure that respirable crystalline silica levels remain below applicable exposure limits.**
- **Consult local authorities and a qualified industrial hygienist to implement the required occupational safety measures in compliance with local legislation.**
- **Refer to the Safety Data Sheet of the product available at https://www.atlasconcorde.com/en/download-area for detailed precautions.**

Le operazioni di lavorazione come il taglio, la levigatura e la lucidatura possono generare polvere di silice cristallina respirabile.
- Non maneggiare il materiale fino a quando tutte le precauzioni di sicurezza non sono state lette, comprese e implementate.
- Utilizzare sempre metodi a umido (applicare acqua) durante tutte le fasi di lavorazione e fabbricazione.
- Evitare di generare polvere aerea, specialmente senza un adeguato equipaggiamento di protezione respiratoria e sistemi adeguati di filtrazione e ventilazione dell'aria, che dipendono dalle condizioni specifiche del luogo di lavoro. È necessario effettuare monitoraggi dell'aria per garantire che i livelli di silice cristallina respirabile rimangano al di sotto dei limiti di esposizione applicabili.
- Consultare le autorità locali e un igienista industriale qualificato per implementare le misure di sicurezza sul lavoro richieste in conformità con la legislazione locale.
- Fare riferimento alla Scheda di Sicurezza del prodotto disponibile su **https://www.atlasconcorde.com/it/download-area** per le precauzioni dettagliate.

Les opérations de traitement telles que la découpe, le meulage et le polissage peuvent générer de la poussière de silice cristalline alvéolaire.
- Ne pas manipuler avant d'avoir lu, compris et appliqué toutes les précautions de sécurité.
- Utiliser toujours des méthodes humides (application d'eau) lors de toutes les étapes de fabrication et de traitement.
- Éviter de générer des poussières en suspension dans l'air, en particulier en l'absence d'un équipement de protection respiratoire approprié et de systèmes adéquats de filtration et de ventilation de l'air, dont l'efficacité dépend des conditions spécifiques du lieu de travail. Une surveillance de l'air doit être effectuée afin de s'assurer que les niveaux de silice cristalline alvéolaire restent inférieurs aux limites d'exposition applicables.
- Consulter les autorités locales ainsi qu'un hygiéniste industriel qualifié pour mettre en oeuvre les mesures de sécurité au travail requises conformément à la législation locale.
- Se référer à la fiche de données de sécurité du produit disponible sur **https://www.atlasconcorde.com/fr/download-area** pour connaître les précautions détaillées.

Bearbeitungen wie das Schneiden, Schleifen und Polieren können lungengängigen Staub aus kristallinem Siliciumdioxid entstehen lassen.
- Das Material darf erst dann verarbeitet werden, wenn alle Vorsichtsmaßnahmen gelesen, verstanden und umgesetzt wurden.
- In allen Bearbeitungs- und Fertigungsphasen stets Nassverfahren (mit Wasser) anwenden.
- Die Entstehung von Staub in der Luft vermeiden, insbesondere dann, wenn keine geeignete Atemschutzausrüstung und keine angemessenen Luftfilter- und Belüftungssysteme zum Einsatz kommen, die von den spezifischen, am Arbeitsplatz herrschenden Bedingungen abhängen. Die Luft muss kontrolliert werden, um sicherzustellen, dass die Konzentration an lungengängigem kristallinem Siliciumdioxid unter den zulässigen Expositionsgrenzen bleibt.
- Wenden Sie sich an die örtlichen Behörden und einen qualifizierten Arbeitshygieniker, um die gemäß den örtlichen Vorschriften erforderlichen Arbeitsschutzmaßnahmen umzusetzen.
- Genauere Vorsichtsmaßnahmen finden Sie im Sicherheitsdatenblatt des Produkts unter **https://www.atlasconcorde.com/de/download-area**

Las operaciones como el corte, esmerilado y pulido pueden generar polvo de sílice cristalina respirable.
- No manipule el producto hasta haber leído, comprendido y aplicado todas las precauciones de seguridad correspondientes.
- Utilice siempre métodos húmedos (aplicación de agua) durante todas las fases de trabajo.
- Evite generar polvo en suspensión, especialmente si no se dispone de equipos de protección respiratoria y sistemas de ventilación/filtración adecuados, cuya idoneidad debe evaluarse según las condiciones específicas del entorno laboral. Se debe realizar un control de calidad del aire para asegurar que los niveles de exposición a la sílice cristalina respirable se mantengan por debajo de los límites permitidos.
- Consulte con las autoridades locales y con un higienista industrial cualificado para implementar las medidas de seguridad necesarias conforme a la normativa local.
- Consulte la Ficha de Datos de Seguridad del producto en: **https://www.atlasconcorde.com/es/download-area** para obtener detalles adicionales sobre medidas de seguridad.

Такие операции обработки материала, как резка, шлифовка и полировка могут приводить к появлению вдыхаемой пыли кристаллического кремния.
- Не работайте с материалом до тех пор, пока все меры безопасности не будут прочитаны, усвоены и внедрены.
- На всех этапах обработки и производства всегда используйте влажные методы (применяйте воду).
- Избегайте образования воздушной пыли, в особенности при отсутствии надлежащих средств защиты дыхательных путей, а также подходящих систем фильтрации и вентиляции воздуха, которые зависят от специальных условий на рабочем месте. Для того чтобы уровни содержания кристаллического кремния во вдыхаемом воздухе находились ниже применимых предельных значений, необходимо осуществлять мониторинг воздуха.
- Обращайтесь в местные органы власти и к квалифицированному специалисту по промышленной гигиене касаемо вопроса внедрения мер безопасности на рабочем месте, требуемых местным законодательством.
- Подробно о мерах предосторожности изложено в паспорте безопасности изделия, с которым можно ознакомиться, перейдя по ссылке **https://www.atlasconcorde.com/ru/download-area.**

Velvetech

**The advanced technology patented in italy,
inspired by the art of polishing surfaces for an impeccable smooth touch**

USER GUIDE

DISCOVER MORE

PRECAUTIONS VELVETECH

SURFACE FEATURES

- Velvet is a delicate surface that requires proper care.
- Velvet is a surface that features irregularities, streaks, and superficial halos, particularly visible under oblique or reflected light.
- The Velvet finish may show noticeable marks, caused primarily by contact with metal objects (e.g. metal legs of chairs and furniture) and other abrasive materials. To best protect and preserve it, it is essential to follow the cleaning and maintenance guidelines

CARATTERISTICHE DELLA SUPERFICIE

- Velvet è una superficie delicata che merita attenzione.
- Velvet è una superficie che presenta irregolarità, screziature e alonature superficiali, visibili soprattutto alla luce radente.
- La finitura Velvet può mostrare segni particolarmente evidenti sulla superficie, causati soprattutto dal contatto con oggetti metallici (es. piedini in metallo di sedie e mobili) e altri materiali abrasivi. Per preservarla al meglio, è fondamentale seguire le indicazioni di pulizia e manutenzione.

DAILY CLEANING & CARE

- Do not use detergents with waxing, polishing, or shining properties.
- Do not use steel wood pads or excessively abrasive materials.
- Clean with a damp cloth and diluted neutral detergent, or use a scrubber dryer with soft nylon brushes for large areas, following the manufacturer's instructions.
- Periodic cleaning with a melamine brush and diluted alkaline detergent is recommended, following the manufacturer's instructions.
- In humid environments or those with organic residues (e.g., limescale or staining agents), use an acid-based detergent and rinse thoroughly, following the manufacturer's instructions.
- In spaces with outdoor exposure, use mats or dirt-trapping devices to retain moisture and dust.
- Apply protective pads to movable elements in contact with the surface (e.g., furniture and chair legs, etc.).
- During installation, use leveling spacers with anti-scratch pads.

PULIZIA E CURA QUOTIDIANA

- Non utilizzare detergenti con proprietà ceranti, brillantanti e lucidanti.
- Non utilizzare pagliette in metallo o eccessivamente abrasive.
- Pulire con panno umido e detergente neutro in soluzione diluita o lavasciuga con spazzole in nylon morbide per grandi superfici, seguendo le istruzioni del produttore.
- È consigliato effettuare periodicamente una pulizia con spazzola melaminica con detergente alacalino diluito, seguendo le istruzioni del produttore.
- In ambienti umidi o con residui organici (esempio: calcare o agenti macchianti) utilizzare un detergente a base acida, seguendo le istruzioni del produttore, ed eseguire un abbondante risciacquo.
- In ambienti a contatto con l'esterno, utilizzare tappeti o dispositivi assorbi-sporco per trattenere umidità e polvere.
- Applicare protezioni agli elementi mobili a contatto con la superficie (Esempio: piedini di arredi di mobili, sedie etc.).
- Utilizzare distanziatori livellanti con pedane anti-graffio durante la posa.

INDICATIONS OF USE

- Recommended for low-traffic flooring, preferably for residential use (e.g., bedrooms, living rooms, studies, private kitchens, private bathrooms, etc.).
- Not recommended for flooring where anti-slip performance is required.
- Recommended for flooring with a coefficient of friction (DCOF) >0.42 Wet (ANSI A326.3).
- Please note that the indication for use is purely indicative, and it is always the designer's responsibility to assess the suitability of the product for specific use conditions and local regulations, taking into account the variables of the intended environment.

INDICAZIONI D'USO

- Consigliata per pavimenti a basso traffico, preferibilmente ad utilizzo residenziale (Esempio: Camere da letto, soggiorni, studi, cucine private, bagni privati, etc.).
- Non consigliata per pavimenti dove è richiesta resistenza antiscivolo.
- Consigliata per pavimenti con grado di coefficiente di attrito di DCOF (ANSI A326.3) >0,42Wet.
- Si rammenta che l'indicazione d'uso è da ritenersi puramente indicativa e che è sempre compito del progettista valutare l'idoneità del prodotto alle condizioni specifiche di utilizzo e alle norme locali in funzione delle variabili che si possono verificare nell'ambiente di destinazione.

CLEANING & MAINTENANCE AFTER LAYING

- Always perform a preliminary cleaning test, regardless of the grout used (cementitious grout, class CG-EN 13888 in contrast or epoxy grout, class RG-EN 13888).
- For cementitious grout, use a buffered acid cleaner and rinse thoroughly, following the manufacturer's instructions.
- For epoxy grouts, remove residues before they harden and use specific cleaners, following the manufacturer's instructions.

PULIZIA E MANUTENZIONE DI FINE CANTIERE

- Eseguire sempre una prova di pulizia preliminare, qualsiasi sia lo stucco utilizzato (stucco cementizio classe CG-EN 13888 a contrasto o stucco epossidico classe RG-EN 13888).
- In caso di stucchi cementizi, utilizzare un detergente acido tamponato poi risciacquare abbondantemente, seguendo le istruzioni del produttore.
- In caso di stucchi epossidici, rimuovere i residui prima che si induriscano e utilizzare pulitori specifici, seguendo le istruzioni del produttore.

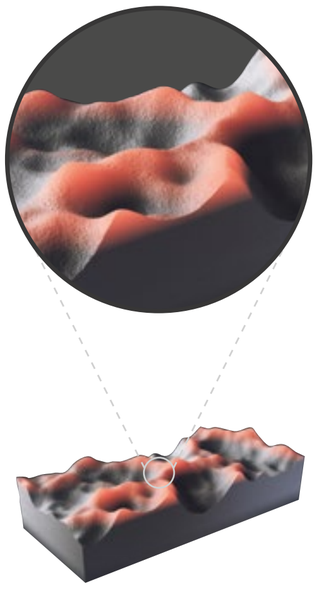
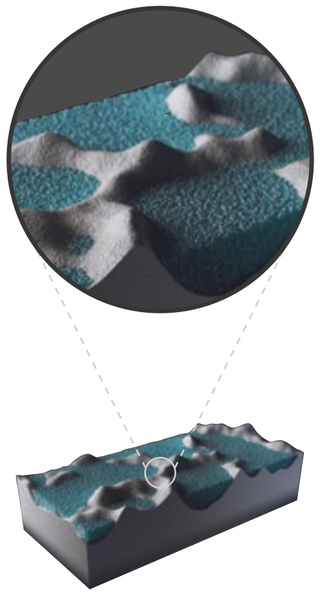
Sensitech



Traditional anti-slip surface



The innovative Sensitech Surface

Sensitech is the high-tech surface for indoor and outdoor settings created by Atlas Concorde Laboratories, patented in Europe, in Russia and the United States.The surface combines high slip resistance performance with tactile softness. With Sensitech, the meaning of surface evolves and takes on a reassuring, pleasant and practical touch, making architectural spaces more comfortable and appealing.

Sensitech è la superficie ad alto coefficiente tecnologico per gli ambienti interni ed esterni realizzata dai Laboratori Atlas Concorde, brevettata in Europa, in Russia e negli Stati Uniti. La superficie coniuga elevate prestazioni di resistenza allo scivolamento ad una maggiore morbidezza tattile. Con Sensitech il significato di superficie si evolve e assume un tocco rassicurante, piacevole e pratico, rendendo gli spazi architettonici sempre più confortevoli e appaganti.

Certification for buildings / Rating dell'edificio

Atlas Concorde porcelain tiles and single-fired products can contribute towards earning pointsneeded for LEED® certification.

- **Valid certification for porcelain tile and wall tiles.** - Certificazione valida per prodotti in gres porcellanato e rivestimenti.
- **Shipments can be made in accordance with national requirements anywhere in the world, even in markets with complex customs procedures such as Egypt, Morocco and Kurdistan, thanks to our active cooperation with accredited certification bodies in each country.** - Possibilità di spedizioni conformi alle prescrizioni nazionali ovunque nel mondo, anche in mercati con procedure doganali complesse come Egitto, Marocco, Kurdistan, grazie alla collaborazione sempre attiva con gli enti di certificazione accreditati in ciascun paese. - Dank unserer aktiven Zusammenarbeit mit den akkreditierten Zertifizierungsstellen in den einzelnen Ländern können die Sendungen in Übereinstimmung mit den nationalen Anforderungen überall auf der Welt versandt werden, selbst auf Märkten mit komplexen Zollverfahren wie Ägypten, Marokko und Kurdistan. - Possibilité d'expéditions conformes aux prescriptions nationales partout dans le monde, même sur les marchés dont les procédures douanières sont complexes comme l'Egypte, le Maroc ou le Kurdistan, grâce à la collaboration toujours active avec les organismes de certification homologués dans chaque pays. - Se pueden realizar envíos según la normativa nacional a cualquier parte del mundo, incluso a mercados con procedimientos aduaneros complejos como Egipto, Marruecos o Kurdistán, gracias a la cooperación permanente con los organismos de certificación acreditados en cada país. - Компания имеет возможность осуществлять поставки в любую точку мира в соответствии с национальными требованиями, даже на рынках со сложными таможенными процедурами, таких как Египет, Марокко, Курдистан, благодаря неизменно активному сотрудничеству с аккредитованными органами сертификации в каждой стране.(1

(1) Si consiglia la consultazione della pagina - On vous conseille de vous connecter à: https://database.cstb.fr/fr-FR/holderdetails?Uid=ETB-2094&AppRef=QB32
(2) Per ulteriori informazioni sulle collezioni "in via di certificazione" scrivere a france@atlasconcorde.it - Pour toute information complémentaire concernant les collections « en cours de certification », merci d'écrire à france@atlasconcorde.it
(3) **All Atlas Concorde porcelain tiles and wall tiles products can be used for building projects that follow the guidelines of the GREEN BUILDING COUNCIL and can contribute to the achievement of the LEED V4 rating for buildings.** - Tutti i prodotti Atlas Concorde in gres porcellanato e in monoporosa possono essere utilizzati per progetti edilizi che seguono le linee guida del GREEN BUILDING COUNCIL e possono contribuire all'ottenimento del rating LEED V4 degli edifici.

Соответствует норме	EN 14411 (ISO 13006)	Приложение	G	Группа	Bla

(*) **The permissible deviation, in % or mm, of the average size for each tile (2 or 4 sides) from work size (WS).**
Deviazione ammissibile, in % oppure mm, della dimensione media di ogni piastrella (2 oppure 4 lati) dalla dimensione di fabbricazione (WS).

(**) **The permissible deviation, in % or mm, of the average thickness for each tile from the work size thickness (WS).**
Deviazione ammissibile, in % oppure mm, dello spessore medio di ogni piastrella dallo spessore riportato nella dimensione di fabbricazione (WS).

(***) **The maximum permissible deviation from straightness, in % or mm, related to the corresponding work sizes (WS).**
Deviazione massima ammissibile di rettilineità, in % oppure mm, in rapporto alle dimensione di fabbricazione (WS) corrispondenti.i.

(****) **The maximum permissible deviation from rectangularity, in % or mm, related to the corresponding work sizes (WS).**
Deviazione massima ammissibile di ortogonalità, in % oppure mm, in rapporto alle dimensione di fabbricazione (WS) corrispondenti.

c.c. **The maximum permissible deviation from centre curvature, in % or mm, related to diagonal calculated from the work sizes (WS).**
Deviazione massima ammissibile della curvatura del centro, in % oppure mm, in rapporto alla diagonale calcolata secondo le dimensioni di fabbricazione (WS).

e.c. **The maximum permissible deviation from edge curvature, in % or mm, related to the corresponding work sizes (WS).**
Deviazione massima ammissibile della curvatura dello spigolo, in % oppure mm, in rapporto alle dimensioni di fabbricazione (WS) corrispondenti.

w. **The maximum permissible deviation from warpage, in % or mm, related to diagonal calculated from the work sizes (WS).**
Deviazione massima ammissibile dello svergolamento, in % oppure mm, in rapporto alla diagonale calcolata secondo le dimensioni di fabbricazione (WS).

(1) **Determination of slip resistance of pedestrian surfaces; it does not cover sports surfaces and road surfaces for vehicles (skid resistance).**
Determinazione della resistenza allo scivolamento delle superfici pedonabili; non si applica alle pavimentazioni sportive ed alle pavimentazioni stradali veicolari.

(2). **Anti-slip performance is guaranteed at the time of delivery of the product.**
Le prestazioni anti-slip vengono garantite al momento della consegna del prodotto.

(3). **However, tiles with a DCOF of 0.42 or greater are not necessarily suitable for all projects .The specifier shall determine tiles appropriate for specific project conditions, considering by way of example, but not in limitation, type of use, traffic, expected contaminants, expected maintenance, expected wear, and manufacturers' guidelines and recommendations."**

(4). **For further details, please refer to outdoor design general catalogue.** Per maggiori informazioni riferirsi al catalogo generale Outdoor Design.

(5). **Only for products with 20 mm thickness. Solo per prodotti a 20mm di spessore.**

Соответствует норме	EN 14411 (ISO 13006)	Приложение	L	Группа	BIII

(*) **The permissible deviation, in % or mm, of the average size for each tile (2 or 4 sides) from work size (WS).**
Deviazione ammissibile, in % oppure mm, della dimensione media di ogni piastrella (2 oppure 4 lati) dalla dimensione di fabbricazione (WS).

(**) **The permissible deviation, in % or mm, of the average thickness for each tile from the work size thickness (WS).**
Deviazione ammissibile, in % oppure mm, dello spessore medio di ogni piastrella dallo spessore riportato nella dimensione di fabbricazione (WS).

(***) **The maximum permissible deviation from straightness, in % or mm, related to the corresponding work sizes (WS).**
Deviazione massima ammissibile di rettilineità, in % oppure mm, in rapporto alle dimensione di fabbricazione (WS) corrispondenti.i.

(****) **The maximum permissible deviation from rectangularity, in % or mm, related to the corresponding work sizes (WS).**
Deviazione massima ammissibile di ortogonalità, in % oppure mm, in rapporto alle dimensione di fabbricazione (WS) corrispondenti.

c.c. **The maximum permissible deviation from centre curvature, in % or mm, related to diagonal calculated from the work sizes (WS).**
Deviazione massima ammissibile della curvatura del centro, in % oppure mm, in rapporto alla diagonale calcolata secondo le dimensioni di fabbricazione (WS).

e.c. **The maximum permissible deviation from edge curvature, in % or mm, related to the corresponding work sizes (WS).**
Deviazione massima ammissibile della curvatura dello spigolo, in % oppure mm, in rapporto alle dimensioni di fabbricazione (WS) corrispondenti.

w. **The maximum permissible deviation from warpage, in % or mm, related to diagonal calculated from the work sizes (WS).**
Deviazione massima ammissibile dello svergolamento, in % oppure mm, in rapporto alla diagonale calcolata secondo le dimensioni di fabbricazione (WS).

(1) **Determination of slip resistance of pedestrian surfaces; it does not cover sports surfaces and road surfaces for vehicles (skid resistance).**
Determinazione della resistenza allo scivolamento delle superfici pedonabili; non si applica alle pavimentazioni sportive ed alle pavimentazioni stradali veicolari.

(2). **Anti-slip performance is guaranteed at the time of delivery of the product.**
Le prestazioni anti-slip vengono garantite al momento della consegna del prodotto.

(3). **However, tiles with a DCOF of 0.42 or greater are not necessarily suitable for all projects .The specifier shall determine tiles appropriate for specific project conditions, considering by way of example, but not in limitation, type of use, traffic, expected contaminants, expected maintenance, expected wear, and manufacturers' guidelines and recommendations."**

(4). **For further details, please refer to outdoor design general catalogue.** Per maggiori informazioni riferirsi al catalogo generale Outdoor Design.

(5). **Only for products with 20 mm thickness. Solo per prodotti a 20mm di spessore.**

Destinations of use

Recommended products by intended use *

H HEAVY TRAFFIC

HEAVY COMMERCIAL
Malls, airports, places of worship, schools, museums, squares, hospitals, hotels - foyers, undergrounds, train stations, etc.

COMMERCIALI PESANTI
Mall, aeroporti, luoghi di culto, scuole, musei, piazze, ospedali, hotel - hall di ingresso, metropolitane, stazioni ferroviarie, ecc...

M MEDIUM TRAFFIC*

MEDIUM COMMERCIAL (1)
Restaurants, offices, shops, public restrooms, public offices, hotels except for foyers, business lounges, mandatory passageways and areas subject to the transit of trolleys with hard wheels or highly concentrated loads.

COMMERCIALI MEDI (1)
Ristoranti, uffici, negozi, bagni pubblici, uffici pubblici, hotel - ad esclusione delle hall di ingresso, business lounge, di passaggi obbligati e zone soggetto a transito di carrelli con ruote dure ovvero elevati carichi concentrati.

L LIGHT TRAFFIC

RESIDENTIAL
Bedrooms, living rooms, studies, private kitchens, private bathrooms, etc.

RESIDENZIALI
Camere da letto, soggiorni, studi, cucine private, bagni privati...

Outdoor Sensitech 20 mm — H M L

Grip / Grip Sensitech 9 mm — H M L

Matte Sensitech 9 mm — H M L

Matte 9 mm — H M L

Matte 6 mm — M L

Silk 6 - 9 mm — M L

Polished 6 - 9 mm — M L

Velvet Velvetech 9 mm (2) — L

INTENDED USES FOR OUTDOORS

INDUSTRIAL AND/OR COMMERCIAL AREAS FOR VEHICLES
Squares, public car parks, filling stations, paving for forklift trucks, pallet jacks, trailer trucks, buses, industrial platforms, etc.

INSTALLATION METHOD
1. LAYING WITH ADHESIVE using the "double buttering" method. Choose porcelain tile with a thickness greater than or equal to 20mm with anti-slip finish (3).

AREE INDUSTRIALI E/O COMMERCIALI CARRABILI
Piazze, parcheggi pubblici, stazioni di rifornimento, pavimentazioni con transito di carrelli elevatori, transpallet, autoarticolati, autobus, piattaforme industriali, ecc...

TIPO DI POSA
1. POSA CON ADESIVI con il metodo della "doppia spalmatura". Utilizzare gres porcellanato a spessore superiore o uguale a 20mm con finitura anti-scivolo (3).

RESIDENTIAL AREAS FOR VEHICLES
Outdoor courtyards, private homes, apartment complex parking lots (garages), etc. Pavements used only by cars.

INSTALLATION METHOD
LAYING WITH ADHESIVE using the "double buttering" method.
Choose porcelain tiles with anti-slip finish (3).

AREE RESIDENZIALI CARRABILI
Cortili esterni abitazioni private, parcheggi condominiali (garage interni), ecc... Pavimentazioni a transito esclusivo di autovetture.

TIPO DI POSA
POSA CON ADESIVI con il metodo della "doppia spalmatura". Utilizzare gres porcellanato con finitura anti-scivolo (3).

AREAS FOR PEDESTRIANS ONLY
Patios, gardens and walkways, terraces, balconies, urban pedestrian areas, etc.

INSTALLATION METHOD
1. RAISED INSTALLATION AND "DRY" LAYING (on grass, sand and gravel). Choose porcelain tile with a thickness greater than or equal to 20mm with anti-slip finish (3).
2. LAYING WITH ADHESIVE using the "double buttering" method. Choose porcelain tiles with anti-slip finish (3).

AREE SOLO PEDONABILI
Patii, giardini e camminamenti, terrazze, balconi, aree urbane pedonali, ecc...

TIPO DI POSA
1. POSA SOPRAELEVATA E A "SECCO" (su erba, sabbia e ghiaia). Utilizzare gres porcelanato a spessore superiore o uguale a 20mm con finitura anti-scivolo (3).
2. POSA CON ADESIVI con il metodo della "doppia spalmatura". Utilizzare gres porcelanato con finitura anti-scivolo (3).

POOL EDGES
INSTALLATION METHOD
LAYING WITH ADHESIVE using the "double buttering" method. Choose porcelain tiles with anti-slip finish (3).

BORDI PISCINA
TIPO DI POSA
POSA CON ADESIVI con il metodo della "doppia spalmatura". Utilizzare gres porcellanato con finitura anti-scivolo (3).

* **These indications are purely indicative. The designer must assess the product suitability for specific use conditions based on the technical characteristics detailed in the technical data sheets available in the Download section of the Atlas Concorde website. Factors such as traffic intensity, traffic quality (foot traffic in the presence of sand, debris, etc.), expected distributed or concentrated, static or dynamic loads (pedestrians, wheels, means of transport, etc.) and any other specific situation to which the material may be exposed.** - L'indicazione d'uso proposta è comunque da ritenersi indicativa. Sulla base delle caratteristiche tecniche riportate nelle schede tecniche disponibili nell'area Download del sito Atlas Concorde è sempre compito del progettista valutare l'idoneità del prodotto alle condizioni specifiche di utilizzo in funzione delle sollecitazioni e delle variabili che si possono verificare nell'ambiente di destinazione alterandone le sue caratteristiche, a titolo d'esempio, all'intensità del traffico, alla qualità del traffico (calpestio in presenza di sabbia, di detriti...), ai carichi, distribuiti o concentrati, statici o dinamici attesi (pedonale, ruote, mezzi di trasporto,...) e a qualsiasi altra situazione concreta a cui può essere esposto il materiale.

(1) **Polished and silk finishes are recommended for low-stress residential or commercial floors where anti-slip performance is not required. The surface's shine and superior ease of cleaning are the result of in-depth studies and extensive technical research aimed at ensuring its durability over time. If the product is in direct contact with the outside, use moisture and dirt absorption devices to prevent scratches. Under no circumstances does Atlas Concorde accept responsibility for any use of the product other than as recommended above.** - Le finiture lappata e silk sono indicate per pavimenti residenziali o commerciali poco sollecitati, laddove non siano richieste prestazioni antiscivolo. La lucentezza e l'elevata facilità di pulizia della superficie sono frutto di studi approfonditi e accurate ricerche tecniche volte a garantirne la persistenza nel tempo. Se il prodotto è a diretto contatto con l'esterno, prevedere dei dispositivi di assorbimento dell'umidità e dello sporco per prevenire la formazione di graffi. Atlas Concorde non si assume in nessun caso la responsabilità per un uso del prodotto diverso da quanto consigliato sopra.

(2) ⚠ **PRECAUTIONS - VELVET IS A DELICATE SURFACE**
The Velvet finish is a delicate surface that requires care. To preserve its beauty and ensure proper use, please refer to our instructions on page 411.
La finitura Velvet è una superficie delicata che merita attenzione. Per mantenerne integra la bellezza e garantire un uso adeguato, consultare le nostre istruzioni pag 411.

(3) **For the properties of slip resistance required in the aforementioned uses it is always necessary to comply with the local laws, regulations and uses, referring to the technical sheets of the selected products.** - Per le proprietà di resistenza allo scivolamento richieste nelle destinazioni d'uso sopra itate occorre sempre attenersi alle normative, leggi ed usi locali facendo riferimento alle schede tecniche dei prodotti selezionati.

Color-Shading

The V-Shade classification indicates the chromatic and/or surface variation among tiles of the same collection.
La classificazione VShade indica variazione cromatica e/o superficiale tra le piastrelle di una stessa collezione.
La classification VShade indique le variation chromatique et/ou superficielle entre des dalles d'une même collection.
Die Klassifizierung V-Shade gibt das Niveau des Farbverlaufs des Produktes oder die Abweichung des Farbtons und/oder Oberfläche unter den Fliesen der gleichen Kollektion an.
La clasificación V-Shade indica el variación cromática y/o superficial que existe entre las baldosas de una misma colección.
Классификация V-Shade указывает на уровень цветовой или фактурной неоднородности плиток, т.е. на отличия по цвету или по фактуре между плитками одной коллекции.

Laying suggestions - cleaning and maintenance

1. LAYING
Before starting the installation process, make sure the laying surface is well cured, flat and completely clean and that the material available is sufficient in quantity and has the right tone and size.

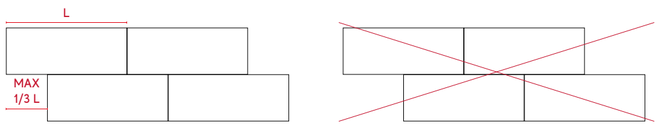
2 CHOICE OF ADHESIVE
The use of an appropriate adhesive is essential for a successful installation. For the installation of ceramic tiles, you should follow the laying instructions provided by leading adhesives manufacturers.
You should choose the most suitable adhesive on the basis of the following factors:
- laying surface
- type and size of tile
- use of tiled surface (floor/wall; indoor/outdoor)
- weather conditions at the time of laying
- waiting time before the ceramic surface can be used

USE Laying surface	TYPE OF TILE Type	SIZE (cm)	RECOMMENDED ADHESIVES - European Standards EN 12004 Normal Set	 Rapid set
INDOOR FLOORS				
Cementitious screeds Existing cement floors (cement concrete, bush-hammered) Anhydrite screeds (following application of a suitable primer) Heating floors Existing ceramic, terrazzo and natural stone floors Waterproofing in bathrooms	porcelain tiles	< 30x30 cm	Improved cementitious adhesives with long open time (Class C2E).	Improved cementitious adhesives, slip resistant and deformable (Class C2FT - S1). •
		≥ 30x30 cm < 60x60 cm	Improved cementitious adhesives resistant to slip and with long open time (Class C2TE).	Improved cementitious adhesives, slip resistant and deformable (Class C2FT - S1). •
		≥ 60x60 cm	Improved cementitious adhesives with long open time and deformable (Class C2E - S1).	Improved cementitious adhesives, slip resistant and deformable (Class C2FT - S1). •
INDOOR WALL TILES				
Cementitious plaster or mortar Plaster (plaster or panels, following application of a suitable primer) Painted walls	wall tiles	any size	Improved cementitious adhesives resistant to slip and with long open time (Class C2TE).	Improved cementitious adhesives, slip resistant and deformable (Class C2FT - S1). •
	porcelain tiles	< 30x30 cm	Improved cementitious adhesives resistant to slip and with long open time (Class C2TE).	Improved cementitious adhesives, slip resistant and deformable (Class C2FT - S1). •
Cast concrete (Following application of primer on gypsum-based joints) Plasterboard Waterproofing in bathrooms and showers Existing ceramic tiles		≥ 30x30 cm < 60x60 cm	Improved cementitious adhesives resistant to slip and with long open time (Class C2TE).	Improved cementitious adhesives, slip resistant and deformable (Class C2FT - S1). •
		≥ 60x60 cm	Improved cementitious adhesives resistant to slip with long open time and deformable (Class C2TE - S1).	Improved cementitious adhesives, slip resistant and deformable (Class C2FT - S1). •
OUTDOOR FLOORS				
Cementitious screeds Concrete floor Layers of waterproofing	porcelain tiles	< 30x30 cm	A Improved cementitious adhesives resistant to slip and with long open time (Class C2TE).	Improved cementitious adhesives, slip resistant and deformable (Class C2FT - S1). •
		≤ 30x30 cm < 60x60 cm	Improved cementitious adhesives resistant to slip with long open time and deformable (Class C2TE - S1).	Improved cementitious adhesives, slip resistant and deformable (Class C2FT - S1). •
		≥ 60x60 cm	Improved cementitious adhesives with long open time and highly deformable (Class C2E - S2).	Improved cementitious adhesives with long open time and highly deformable (Class C2FE - S2). •
OUTDOOR WALLS				
Cementitious plaster Concrete cast in situ or prefabricated	porcelain tiles	< 30x30 cm	Improved cementitious adhesives resistant to slip with long open time and deformable (Class C2TE - S1).	Improved cementitious adhesives, slip resistant and deformable (Class C2FT - S1). •
		≥ 30x30 cm < 60x60 cm ••	Improved cementitious adhesives resistant to slip with long open time and deformable (Class C2TE - S1).	Improved cementitious adhesives, slip resistant and deformable (Class C2FT - S1). •
		≥ 60x60 cm ••	Improved cementitious adhesives with long open time and highly deformable (Class C2E - S2).	Improved and highly deformable cementitious adhesives (Class C2F - S2). •

• For large size tiles laid at a height of more than three meters, certain international regulations specify that tiles should be laid using a mixed system of adhesive and mechanical fixtures chosen in relation to the weight of the tile, height of the tiling and site conditions.
•• For tiles with a side measuring more than 30 cm laid at heights of more than three meters, certain international regulations specify the use of an additional mechanical anchor that ensures the retention of the tile in case of accidental detachment, to be chosen in relation to the weight of the tile, the height of the tiling and the site conditions.

3. LAYING THE TILES
Installation should be performed by qualified personnel using the proper tools. The laying of the material should be checked before the adhesive is dry so that any corrections can be made. In any case, Atlas Concorde does not recommend installation without joints or joints smaller than 2 mm.
When laying tiles with a side longer than 60 cm and in any case for commercial indoor environments or outdoors it is essential to spread the adhesive using double buttering, applying the adhesive in a linear method parallel to the short side both on the substrate and on the back of the tile, thus ensuring perfect adhesion between the tile and substrate. To minimize the unevenness of the tiles both on the floor and on the wall it is recommended to use "easy installation systems" with spacers and levelers which should include anti-scratch rubber rings when installing glazed white body wall tiles and/or porcelain tiles with polished surfaces.
Spread the adhesive using a suitably toothed spatula.

3A. LAYING RECTANGULAR FORMATS
For straight courses of rectangular formats, the maximum offset between tiles must not exceed 1/3 of the length of the adjacent side.



4. SQUARE OR PERPENDICULAR CUTS
Processing operations such as cutting, grinding and polishing may generate respirable crystalline silica dust.
- Do not handle until all safety precautions have been read, understood and implemented.
- Always use wet methods (apply water) during all fabrication and processing.
- Avoid generating airborne dust, especially without appropriate respiratory protective equipment and adequate air filtration and ventilation systems, which depend on the specific workplace conditions. Air monitoring should be conducted to ensure that respirable crystalline silica levels remain below applicable exposure limits.
- Consult local authorities and a qualified industrial hygienist to implement the required occupational safety measures in compliance with local legislation.
- Refer to the Safety Data Sheet of the product available at **https://www.atlasconcorde.com/en/download-area** for detailed precautions.

5. JOINTS AND GROUTING
Before filling the joints, it is recommended to wait until the adhesive is completely dry and to ensure that the joints are free of all traces of adhesive and/or dust. In any case, Atlas Concorde does not recommend installation without joints or joints smaller than 2 mm. For joints in a color that contrasts with the tiles, it is recommended to test the grout in a small, hidden area. You should follow the instructions provided by leading grout manufacturers.

USE	RECOMMENDED GROUTS - EUROPEAN STANDARDS EN 13888
Residential interiors	Improved cementitious mortars for joints (Class CG2)
Damp interiors (bathrooms, showers) and outdoors	Improved cementitious mortars for joints with low water absorption (CG2 WA)
Commercial premises	Improved cementitious mortars for joints with high resistance to abrasion (Class CG2 A)
Premises requiring total hygiene and resistance to chemical agents (swimming pools, kitchen work surfaces, food industry, hospitals, supermarkets, etc).	Epoxy mortars (Class RG).

5A. ELIMINATION OF EXCESS GROUT
To correctly and easily eliminate excess grout, follow the instructions given by the grout manufacturer. In general, proceed as follows:
Cementitious grouts
When the grout becomes opaque (normally after 10-20 minutes), clean with a hard cellulose sponge using movements on a diagonal to the joints. It is important to respect the drying time to avoid removing the grout from the joints.
Epoxy grouts
When the mixture is still fresh, wet the surface with plenty of water, emulsifying with a pad like Scotch-Brite®, paying attention not to empty the joints.
The residual grout liquid can be removed with a hard cellulose sponge (to be replaced when excessively soaked with resin).
It is vital to remove epoxy grout rapidly before it starts hardening as it is extremely difficult to remove subsequently. If the epoxy grout has started to harden, try adding 10% alcohol to the washing water.

6. CLEANING AND MAINTENANCE

6A. FINAL SITE CLEANING
The work site is considered finished when it is cleared of any tools/materials used for the job. To reduce the risk of damage to the tiled surface, it is necessary to protect it and avoid the presence of abrasive materials.
After a few days, eliminate residues with a commercial Scotch-Brite® pad, brush or single brush floor cleaner (for large surfaces).
For walls, use a neutral detergent in hot water.
For floors, use a mild acid wash diluted according to the type of surface (smooth or textured). It is important to protect marble or metal inserts previously with adhesive tape.
Rinse with abundant clean water to eliminate all marks or residues from the joints.
If necessary, repeat the acid wash at a higher concentration, unless there are marble or metal inserts. Do not use diluted commercially-available acids.

6B. ROUTINE MAINTENANCE
You are recommended to use ordinary neutral detergent diluted in water.
Avoid using acid or alkaline products, waxes and/or impregnants and metal pads (iron or steel sponges).
In the event of heavy dirt or particularly textured surfaces, use an alkaline detergent and rinse after washing.
For large surfaces, the use of a floor washing machine is recommended.

6C. UNSCHEDULED MAINTENANCE
In the event of dirt resistant to the ordinary cleaning, use a suitable detergent for the particular kind of dirt.

TYPE OF DIRT (resistant to ordinary maintenance)	DETERGENT/SOLVENT
Coal, lime efflorescence, chalk, metal marks, rust, graphite, emulsion paint	Acid detergents*
Coca cola, coffee, wine, beer, ice cream	Alkaline detergents
Resin, silicon or mechanical oils, candle wax, paint	Solvents
Tire marks, sole marks, suction cup marks	Alkaline detergent in an abrasive paste

* Important: Acid products may corrode marble, granite, natural stone and metal. Avoid using in the presence of decoration or inserts in these materials.

The cleaning characteristics of the materials may vary significantly depending on the laying method, conditions of use, type of surface and environment. Generally speaking, the higher the non-slip characteristics of the tiles, the more difficult they are to clean.
The maintenance and cleaning operative should always test each cleaning method empirically in advance (if possible on a piece of the material not laid)
In the case of particularly heavy use (for example, mechanical workshops or environments with a heavy presence of oily residues and tire marks), incorrect laying or inappropriate cleaning, Atlas Concorde declines all responsibility for the effectiveness of cleaning and maintenance operations.

Atlas Concorde cannot, under any circumstances, be held responsible for events, damage or defects caused by incorrect laying, negligent cleaning and maintenance or the use of materials and adhesives inappropriate for the use.

FR-DE-ES-RU

Suggerimenti per la posa, pulizia e manutenzione

1. POSA IN OPERA
Prima di iniziare la posa, si raccomanda di assicurarsi che la superficie di appoggio sia sufficientemente stagionata, planare e ben pulita e che la fornitura di materiale sia adeguata e sufficiente per quantità, tono e calibro.

2. SCELTA DELL'ADESIVO
L'utilizzo di un adesivo appropriato è di fondamentale importanza per la posa. Si raccomanda di seguire le indicazioni dei migliori produttori di adesivi per la posa di piastrelle ceramiche. In generale, l'adesivo più adeguato si individua considerando i seguenti fattori:
- tipo di supporto
- tipologia e formato delle piastrelle
- destinazione d'uso del rivestimento ceramico (pavimento/rivestimento; interno/esterno)
- condizioni climatiche all'atto della posa
- tempi a disposizione per la messa in esercizio del rivestimento ceramico

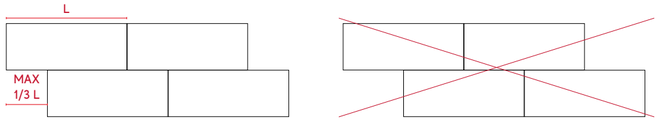
		≥ 30x30 cm < 60x60 cm ●●	Adesivi cementizi migliorati, resistenti allo scivolamento, a tempo aperto allungato e deformabili (classe C2TE - S1).	Adesivi cementizi migliorati resistenti allo scivolamento e deformabili (classe C2FT - S1). ●
		≥ 60x60 cm ●●	Adesivi cementizi migliorati, a tempo aperto allungato e altamente deformabili (classe C2E - S2).	Adesivi cementizi migliorati e altamente deformabili (classe C2F - S2). ●

● Nel caso di posa in condizioni di basse temperature oppure qualora sia necessario mettere in esercizio rapidamente il rivestimento ceramico è preferibile l'utilizzo di adesivi cementizi migliorati a presa rapida (Classe C2F - EN 12004).
●● Nel caso di piastrelle con un lato maggiore di 30 cm posate ad altezze superiori ai 3 metri, alcune normative internazionali prevedono l'utilizzo di un ancoraggio meccanico supplementare che assicuri la ritenzione della piastrella in caso accidentale di distacco, da scegliere in relazione al peso della piastrella, all'altezza del rivestimento ed alle condizioni del cantiere.

3. STESURA DEGLI ADESIVI E POSA DELLE PIASTRELLE:
La posa deve essere effettuata da personale qualificato con l'ausilio di attrezzi adeguati. È opportuno verificare la posa del materiale prima che il collante sia secco in modo da poter provvedere ad eventuali correzioni.
Atlas Concorde sconsiglia in ogni caso la posa a giunto unito o posa con fughe inferiori a 2mm.
Nel caso di posa di piastrelle con un lato maggiore di 60cm e in ogni caso per ambienti interni commerciali oppure all'esterno è fondamentale stendere l'adesivo con il sistema della doppia spalmatura applicando la colla linearmente in direzione parallela al lato corto sia sul supporto di posa sia sul retro della piastrella, garantendo così la perfetta aderenza all'interfaccia piastrella-supporto.
Per minimizzare i dislivelli della posa sia a pavimento che a rivestimento si raccomanda l'adozione di "sistemi di posa facilitata" con distanziatori e livellatori che possono essere provvisti di pedane anti-sbeccature e anti-graffio nel caso in cui si posino rivestimenti smaltati in pasta bianca e/o gres con finitura lappate.
Nel caso particolare di rivestimenti tridimensionali si consiglia l'utilizzo dei sistemi di livellamento a vite, alternativi a quelli a cuneo.

3A. POSA DI FORMATI RETTANGOLARI
Nel caso di posa "a correre" di formati rettangolari il massimo sfalsamento tra piastrelle non deve superare 1/3 della lunghezza del lato adiacente.



4. ESECUZIONI DI TAGLI QUADRATI O SQUADRI
Le operazioni di lavorazione come il taglio, la levigatura e la lucidatura possono generare polvere di silice cristallina respirabile.
- Non maneggiare il materiale fino a quando tutte le precauzioni di sicurezza non sono state lette, comprese e implementate.
- Utilizzare sempre metodi a umido (applicare acqua) durante tutte le fasi di lavorazione e fabbricazione.
- Evitare di generare polvere aerea, specialmente senza un adeguato equipaggiamento di protezione respiratoria e sistemi adeguati di filtrazione e ventilazione dell'aria, che dipendono dalle condizioni specifiche del luogo di lavoro. È necessario effettuare monitoraggi dell'aria per garantire che i livelli di silice cristallina respirabile rimangano al di sotto dei limiti di esposizione applicabili.
- Consultare le autorità locali e un igienista industriale qualificato per implementare le misure di sicurezza sul lavoro richieste in conformità con la legislazione locale.
- Fare riferimento alla Scheda di Sicurezza del prodotto disponibile su **https://www.atlasconcorde.com/it/download-area** per le precauzioni dettagliate.

5. FUGA E STUCCATURA
Prima di riempire le fughe si consiglia di attendere fino a completa asciugatura del collante e di assicurarsi che i giunti di posano siano liberi da ogni traccia di collante e/o polveri.
Atlas Concorde sconsiglia in ogni caso la posa a giunto unito o posa con fughe inferiori a 2mm. Per fughe in contrasto cromatico con le piastrelle si consiglia di testare il fugante in un'area circoscritta e nascosta della posa. Si raccomanda di seguire le indicazioni dei migliori produttori di stucchi per fughe.

DESTINAZIONE D'USO	STUCCHI CONSIGLIATI - Normativa Europea EN 13888
Ambienti interni residenziali	Malte cementizie per fughe migliorate (Classe CG2)
Ambienti umidi interni (bagni, docce) ed ambienti esterni	Malte cementizie per fughe migliorate con assorbimento di acqua ridotto (classe CG2 WA)
Ambienti ad uso commerciale	Malte cementizie per fughe migliorate con elevata resistenza all'abrasione (classe CG2 A)
Ambienti in cui sia richiesta totale igiene e resistenza agli agenti chimici (piscine, piani di lavoro di cucine, industrie alimentari, ospedali, supermercati, ecc...)	Malte epossidiche (classe RG).

5A. ELIMINAZIONE DELLO STUCCO IN ECCESSO
Per una corretta ed agevole eliminazione degli eccessi di stucco, si raccomanda di seguire le indicazioni del produttore dello stucco. In generale, si consiglia di attenersi a quanto segue.
Stucchi cementizi
Quando lo stucco diventa opaco (normalmente dopo 10-20 minuti), pulire con una spugna di cellulosa dura con movimenti diagonali rispetto alle fughe. E' importante il rispetto di questi tempi per non rischiare di rimuovere lo stucco dalle fughe.
Stucchi epossidici
A impasto ancora fresco, bagnare abbondantemente la superficie emulsionando con un tampone tipo Scotch-Brite®, facendo attenzione a non svuotare le fughe. Il residuo liquido di stucco può essere rimosso con una spugna di cellulosa dura (da sostituire se troppo impregnata di resina). E' fondamentale rimuovere lo stucco epossidico tempestivamente prima che inizi ad indurirsi, in quanto la successiva rimozione risulterebbe estremamente difficile. Nel caso in cui lo stucco epossidico abbia già iniziato a indurirsi, provare ad aggiungere all'acqua di lavaggio il 10% di alcool.

6 PULIZIA E MANUTENZIONE

6A. PULIZIA DI FINE CANTIERE
Il cantiere è da considerarsi finito quando è sgombro da qualunque utensile/materiale derivante dalle lavorazioni. Per ridurre i rischi di danneggiamento della superficie piastrellata è necessario proteggerla ed evitare la presenza di materiali abrasivi.
Dopo alcuni giorni, eliminare i residui di cantiere con spugna commerciale tipo Scotch-Brite® oppure con spazzolone o monospazzola (per grandi superfici).
Per i rivestimenti, utilizzare un detergente neutro diluito in acqua calda.
Per i pavimenti, utilizzare un detergente acido ad azione tamponata, in percentuale di diluizione variabile in funzione del tipo di superficie (liscia oppure strutturata).
E' importante proteggere preventivamente eventuali inserti in marmo o metallo con nastro adesivo.
Risciacquare poi abbondantemente con acqua calda pulita, sino alla eliminazione di qualsiasi alonatura o residuo negli interstizi.
Se necessario, ripetere il lavaggio acido a concentrazioni più elevate ad eccezione del caso in cui siano presenti inserti in marmo o metallo. Evitare l'utilizzo di acidi da ferramenta diluiti.

6B. MANUTENZIONE ORDINARIA
Si consiglia l'utilizzo di un comune detergente neutro diluito in acqua. Evitare l'utilizzo di prodotti acidi, alcalini, ceranti e/o impregnanti e pagliette di metallo (spugnette di ferro e acciaio). In caso di sporchi più intensi o di superfici particolarmente strutturate, usare un detergente a base alcalina risciacquando al termine del lavaggio.
Per le grandi superfici è consigliabile l'utilizzo di macchine lavasciuga.

6C. MANUTENZIONE STRAORDINARIA
Nel caso di tracce di sporco resistenti alla pulizia ordinaria, si raccomanda l'utilizzo di un detergente adeguato in funzione del tipo di sporco:

TIPO DI SPORCO (resistente alla manutenzione ordinaria)	DETERGENTE/SOLVENTE
Carbone, efflorescenze calcaree, gesso, segni metallici, ruggine, grafite, tempere murali	Detergenti a base acida *
Coca cola, caffé, vino, birra, gelato	Detergenti a base alcalina
Resine, oli siliconici o meccanici, cere di candela, vernice	Solventi
Pneumatici, suole di gomma, alonature di ventose	Detergenti basici in pasta abrasiva

* Attenzione: i prodotti a base acida possono corrodere marmo, granito, pietre naturali e metalli, pertanto evitarne l'uso nel caso di decori o inserti realizzati con questi materiali.

Le caratteristiche di pulibilità dei materiali variano in modo significativo per le diverse modalità d'installazione, condizioni d'uso, tipologie di superfici e ambiente. In linea generale, all'aumentare delle caratteristiche di antiscivolosità delle piastrelle aumentano le difficoltà di pulizia.
L'operatore professionale incaricato dell'intervento di manutenzione e pulizia dovrà sempre procedere ad una preliminare verifica empirica (possibilmente su una porzione di materiale non posato) per ogni singolo tipo di intervento.
In caso di condizioni d'uso particolarmente gravose (ad esempio, officine meccaniche o ambienti con forte presenza di residui oleosi e tracce di pneumatico), di errata installazione o di pulizie effettuate in modo inadeguato, Atlas Concorde declina ogni responsabilità in merito all'efficacia delle operazioni di pulizia e manutenzione.

Atlas Concorde non potrà essere ritenuta responsabile per eventi, danni o difetti dovuti ad errata installazione, negligente pulizia e manutenzione, o inadeguata scelta della tipologia dei materiali installati e degli adesivi utilizzati con riguardo alla destinazione.

General conditions of sale

EDITION 4.1, ISSUED 03/11/2025

1. FINALISATION OF THE CONTRACT

1.1. Every sales contract is governed by the main Conditions of Sale set out below. Under no circumstances shall the Seller be bound by any General Contract Terms of the Purchaser, even if they are referred to or incorporated in orders or any other document sent to the Seller, unless the latter has specifically agreed to them in writing.

1.2. The sales contract shall be considered finalised when: (i) the Purchaser receives the Seller's written confirmation of the order; (ii) if the confirmation sent by the Seller contains conditions that differ from the Order received from the Purchaser, when the latter accepts it in writing; (iii) if the Seller does not provide a written confirmation, when the Products are delivered and loaded by the Purchaser and/or the carrier assigned to collect them.

1.3. The Purchaser is in agreement regarding the need to restrict its sales of the Seller's Products to the country within which it, the Purchaser, is based. The Seller considers this rule essential in order to coordinate its sales policy and rationalise its distribution network, with offers better tailored to each country's needs. The Purchaser acknowledges that this rule is also in its own best interests. **The Purchaser therefore undertakes to market the Products supplied by Ceramiche Atlas Concorde SpA only in its country of residence, refraining from promoting active sales, including online, with customers located in the territory of a country other than its own.** For triangular deals, this undertaking shall apply to the country for which the goods are actually destined. The Purchaser shall only resell the product outside its territory with written authorisation from the Seller, except for sales concerning non-first grade or discontinued Products.

1.4. In cases of force majeure, the Party affected by the event shall be relieved of its contractual obligations and of the consequences of its default (penalties, compensation for damages). Force majeure shall be construed as the occurrence of an event or circumstance ("Force Majeure Event") that prevents one Party from fulfilling one or more contractual obligations, if, and to the extent to which, the Party under the impediment ("the Affected Party") demonstrates: a) that the impediment is beyond its reasonable control; b) that it could not reasonably have been foreseen at the time of signing of the contract; and c) that the effects of the impediment could not reasonably have been avoided or overcome by the Affected Party. The Party affected by the Force Majeure Event shall notify the other Party in a timely manner in writing.

1.5. The Parties agree that should the performance of the sales contract become disproportionately burdensome for the Seller due to price increases or other extraordinary events beyond its control and not foreseeable at the time of signing, the latter may request the renegotiation of the contract in order to restore its original fair balance, or its termination.
Examples of such non-foreseeable extraordinary events include significant changes in the prices of raw materials or utilities, wars, natural disasters, etc. The Seller shall notify the other Party of the event which has occurred and its intention to implement the clause without delay, also providing proof of the event's existence and impact. The Parties undertake to cooperate in good faith to find a solution which allows the contract to be continued on fair terms or, if this is impossible, to proceed to terminate it.

2. SHIPPING AND DELIVERY TERMS

2.1. Unless otherwise agreed in the confirmation of order, Products shall be delivered ex-works.

2.2. Unless specifically requested and agreed prior to the Confirmation of Order, the Seller does not guarantee that orders for any single article are all shipped from the same production lot.

2.3. Delivery terms are guideline and any extension of them shall not entitle the Purchaser to claim compensation, under any circumstances.

2.4. If the Purchaser fails to collect the goods within 14 (fourteen) days after the date of the notice that they are ready, the Seller will be forced for reasons of space to return the goods to the storage facilities, thereby incurring additional costs; the Seller specifically reserves the right to charge these additional costs to the Purchaser.

For "custom", i.e. bespoke, products under the "ATLAS CONCORDE HABITAT" brand only, the Purchaser is granted 40 days from notification that the goods are ready to arrange collection of the product. If the Purchaser fails to collect the goods within 40 days, the Seller shall hold the product at the Purchaser's disposal for a further 20 days, after which the contract shall be considered rescinded and the Seller shall be entitled to a penalty in compensation for the damages incurred, set hereby as equal to the price of sale of the product; the Purchaser specifically waives all right to request reduction of this sum.

2.5. The Purchaser shall instruct the carrier to inspect the Products prior to loading and any objections concerning the state of the packaging and any discrepancies between the quantities loaded and those entered in the transport document shall be made at the time of loading and entered in all copies of the transport document. If no such entries are made, the Products loaded shall be considered to be undamaged and complete.

2.6. The Purchaser shall also instruct the carrier to check that the vehicle is suitable for the load in view of the nature of the Products, and to ensure that the goods are correctly loaded and stable, to prevent any breakages in transit and to comply with all safety provisions concerning the roadworthiness of the vehicle.

2.7. Directive 2006/112/EC lays down that a company which sells goods with destination inside the European Union to another company established in a Member State is not obliged to apply VAT; however, Implementing Regulation 2018/1912 requires the seller company to provide proof of receipt of the goods in the country of destination, to be obtained within 90 days after delivery. Under the aforesaid regulations, the Seller will bill goods with destination inside the EU to Purchasers established in an EU Member State without applying VAT, but will request its Purchasers to provide their full cooperation and in all cases to sign the Declaration of Receipt of the goods by the specified deadlines. In the event that the Purchaser fails to return the signed Declaration within 90 days after the sale, the Seller will have no option but to charge it VAT at the rate in force in Italy at the time, calculated on the value of the goods sold and the relative secondary charges. Kindly note that Ceramiche Atlas Concorde sends the request to sign the aforesaid Declaration via the Adobe Sign digital signature system, and the Purchaser is required to add its signature by this means.

3. PRODUCT CHARACTERISTICS

3.1. The Seller declares that the Products comply with the applicable Italian and EU regulations for their sector.

3.2. The Seller only guarantees the technical characteristics published on its website in the Technical Sheet document (at the links https://www.atlasconcorde.com/en/download-area and https://www.atlasplan.com/en/download/).

3.3. The intended use stated by the Seller is always purely guideline, since **the Purchaser is always responsible for assessing the product's suitability for the specific conditions of use, considering the stresses and variables which may occur in the intended location and affect its characteristics,** such as intensity and type of a traffic (e.g. foot traffic with sand and debris present), any adverse weather conditions and any other situation to which the material may actually be exposed. **Any intended use different from and/or not compatible with the Seller's recommendations stated in its General Catalogues available at https://www.atlasconcorde.com/en/download-area, or the specific conditions of use, shall in no way constitute a defect in the product's quality and/or conformity, and therefore no conventional and/or legal warranty shall apply.**

3.4. Any illustrations and/or images of the Products which appear in the Seller's websites, brochures, catalogues, price lists or similar documents are purely guideline and illustrative. Similarly, samples and models only provide guidance concerning the Products' characteristics and are not binding on the Seller unless specifically referred to in the order confirmation as essential characteristics and/or qualities of the product. **Sales are therefore made "by Sample Type" and not "by Sample".**

4. CLAIMS AND WARRANTY FOR FAULTS

4.1. Upon receipt of the Products, the Purchaser shall check them thoroughly, including the packaging, by means of a visual inspection carried out in accordance with point 9 of the UNI EN ISO 10545-2 standards. Approval inspection of the tiled surface prior to installation consists of a visual examination (with the naked eye or with glasses if usually worn) of the surface from a distance of 1.0 metres vertically to it, or a tactile examination if necessary.

4.2. While the acceptability limits enforced by the EN 14411 (ISO 13006) international standard shall apply in all cases, the Parties accept as Identifiable Faults those Product defects immediately visible on receipt of the goods which make the material unfit for purpose or significantly reduce its value, including, for example:

- surface defects;
- defects in decoration (drips, stains, mixing of colours, nonconformity of colour shade, etc.);
- dimensional defects (working size, flatness, thickness, perpendicularity-straightness of edges);
- structural defects (cracks, chips, etc.).

Hidden Faults shall include, for example:

- cracks at right angles to edges or crazing after installation ("flaking") not due to incorrect cutting and installation after sale;
- tendency to stain, i.e. Products which retain dirt at an abnormal rate and are difficult to clean, not due to incorrect installation and/or maintenance;
- defects in shine, i.e. Products which with grazing light reflect the light differently to those next to them, said effect being unintentional and not identifiable by visual and/or tactile inspection.

4.3. The Seller's warranty shall only apply if faults and defects are due to the product's manufacturing process and shall be completely void if they arise from the post-delivery processing of the product, defined as, for example, any shaping, drilling and cutting of tiles or slabs and/or any activity necessary for their use and, in the event that defects occur even though both installation and processing are performed in strict compliance with the recommendations regarding the procedures to be adopted before and during installation provided in the document containing guidance on Installation, Use, Cleaning and Maintenance on the Seller's website (https://www.atlasconcorde.com/en/download-area, "Technical Sheets" section) and with good practice.
Guidance on the Installation, Use and Maintenance of "Atlas Plan" brand products can be requested directly from the Seller or downloaded using the QR code on the label affixed to the Product.

4.4. The warranty is limited only to first grade Products and shall only apply on condition that Identifiable Faults in the goods are reported with 8 (eight) days after delivery, while Hidden Faults must be reported within 8 (eight) days after discovery and the relative right expires one year after delivery.

4.5. In the event that the Purchaser detects Identifiable Faults, the whole lot of material must be kept at the Seller's disposal.

4.6. If it is confirmed that the Product has Identifiable Faults, as defined in point 4.2, **the Seller shall replace the faulty Product with another one with the same or superior characteristics; should this not be possible, the Seller shall apply an appropriate price reduction. As an alternative, the Purchaser may return the faulty Products and shall then be entitled to a refund of the price paid plus the transport cost, with no compensation for any other direct and/or indirect damage.**

4.7. The Seller's warranty shall be void if Products all or some of which are affected by Identifiable Faults have been installed and/or used and/or transformed in any way. **In this case, the Purchaser's action (i.e. the installation and/or use and/or transformation) shall constitute acceptance of the Product "as is"; the Seller shall therefore not accept claims for Products that have already been installed and/or transformed and/or used, as this constitutes implicit acceptance of the Product.**

4.8. If it is confirmed that the Product has Hidden Faults, as defined in point 4.2, **the Seller's warranty shall be limited to replacement of the material with another one with the same or superior characteristics, or if this is not possible to refund of the price paid plus freight costs. In all cases, the Seller's warranty for any direct and/or indirect damage in any way caused by the faulty product shall be limited to an amount that shall not be greater than twice the selling price charged by the Seller, in relation only to those goods which are faulty.**

4.9. In the event that the Purchaser resells the Product to parties who enjoy safeguards under consumer protection legislation (in Italy, Decree Law no. 206/2005), the Purchaser shall be responsible for the conditions applied, if different from those stated herein, and shall ensure that the consumer is able to exercise their rights in accordance with the remedies and terms established by the said legislation. If there are the grounds for the Purchaser to exercise the right of recourse and/or to make a claim against the Seller/manufacturer, the said action shall be subject to the exemptions and limits contained in points 3.2 to 4.8. and points and 4.10., 4.11. and 4.12. herein.

4.10. Before handling the Products, the Purchaser shall check the packaging for damage and verify its strength. **For specific types of packaging** (for example, "Packaging for one or more slabs", such as the "Atlas Concorde Pack" or "EasyPack") **the Purchaser shall comply strictly with the instructions and precautions for handling and use marked on the said packaging and provided on the website at https://lc.cx/dzwelC.**
The Seller does not accept any liability arising from failure to comply with the instructions and/or warnings, or for nonconforming use.

4.11. "Packaging for one or more slabs", such as the "Atlas Concorde Pack" or "EasyPack", **must only be used for the Seller's Products.**

4.12. Products must be used and handled in accordance with the Seller's instructions and all applicable regulations, especially those regarding safety.
Using and/or processing and/or handling the Products without due care and/or incorrectly and/or without adopting the necessary precautions may cause serious personal injury and/or damage to property.

5. PAYMENTS

5.1. The Purchaser shall not suspend or delay payment for the material of which it has taken delivery for any reason, including claimed faults or defects in the material, except naturally for the right to request sums it can show that it has paid unduly.

5.2. For all legal intents and purposes the payment shall only be made to the Seller's registered office, except with specific written authorisation.

5.3. Sums due to the Seller shall not be written off against claimed credits which are not agreed to and/or specifically recognised in writing.

6. CONTRACT LANGUAGE, APPLICABLE LAW, JURISDICTION AND AUTHORITY

6.1. The Contract and these Conditions are drafted in Italian, and in case of discrepancies with translations into other languages the Italian text shall prevail. The Italian text is available at the following link: https://www.atlasconcorde.com/it/condizioni-generali-di-vendita.

6.2. Any disputes relating in any way to the supply of products shall be subject to Italian law and the jurisdiction of the Italian State.

6.3. The Law Court of Modena shall have sole territorial authority for the settlement of any dispute relating in any way to the supply of products, with all others excluded.

The Purchaser hereby confirms that the above general conditions have been negotiated with the Seller and declares that it has specifically read and approved those relating to the procedures for the finalisation of the contract (point 1.3.), claims and warranty for faults (points 4.6 and 4.8.), payments (point 5.1.) and contract language, applicable law, jurisdiction and authority (point 6.3.).

*The General Sales Conditions (GSC) are subject to updates and/or amendments; it is therefore necessary to check on our website (**www.atlasconcorde.com**) and/or on the order confirmation for the updated version of the GSC in force from time to time.*

FR-DE-ES-RU

Condizioni generali di vendita

REV. 4.1. DEL 03/11/2025

1. MODALITA' DI CONCLUSIONE DEL CONTRATTO

1.1. Ogni contratto di vendita è disciplinato dalle seguenti principali Condizioni Generali. In nessun caso il Venditore sarà vincolato da eventuali Condizioni Generali di contratto dell'Acquirente, neanche qualora esse siano richiamate o riportate negli ordini o in qualsiasi altra documentazione trasmessa al Venditore, salvo il caso in cui quest'ultimo le abbia espressamente accettate per iscritto.

1.2. La vendita dovrà ritenersi conclusa nel momento in cui: (i) l'Acquirente riceva una conferma scritta dal Venditore conforme all'ordine; (ii) in caso di conferma inviata dal Venditore contenente condizioni difformi dall'Ordine ricevuto dall'Acquirente quando questi l'accetti per iscritto; (iii) in assenza di conferma scritta da parte del Venditore, nel momento in cui i Prodotti saranno consegnati e caricati dall'Acquirente e/o al vettore incaricato del ritiro.

1.3. L'Acquirente condivide l'esigenza di limitare al territorio nazionale le vendite di Prodotti del Venditore. Il Venditore ritiene questa regola elemento indispensabile per permettergli di coordinare la sua politica commerciale e razionalizzare la rete distributiva, con offerte più orientate alle necessità dei singoli Paesi. Parimenti, l'Acquirente riconosce che tale esigenza costituisce una tutela anche dei propri interessi. **L'Acquirente si obbliga quindi a commercializzare i Prodotti forniti da Ceramiche Atlas Concorde SpA esclusivamente nel suo Paese di residenza, astenendosi dal promuovere vendite attive, anche online, con clienti situati nel territorio di uno Stato diverso dal proprio.** Per le operazioni triangolari il presente obbligo si applica al Paese di effettiva destinazione finale della merce. L'Acquirente potrà rivendere il prodotto al di fuori dal proprio territorio nel caso in cui riceva autorizzazione per iscritto da parte del Venditore, o nel caso in cui la rivendita riguardi Prodotti non di prima scelta, oppure Prodotti fuori produzione.

1.4. Nei casi di forza maggiore, la Parte che subisce l'evento sarà esonerata dall'obbligo di adempiere la sua obbligazione contrattuale e non subirà le conseguenze dell'inadempimento (penali, risarcimento danni). Costituisce forza maggiore il verificarsi di un evento o circostanza ("Evento di Forza Maggiore") che impedisce ad una Parte di eseguire una o più obbligazioni contrattuali, se e nella misura in cui la Parte che subisce l'impedimento ("la Parte Interessata") prova: a) che l'impedimento è fuori dal suo ragionevole controllo; e b) che esso non avrebbe ragionevolmente potuto essere previsto al momento della conclusione del contratto; e c) che gli effetti dell'impedimento non avrebbero potuto essere ragionevolmente evitati o superati dalla Parte Interessata.
La Parte che subisce l'Evento di Forza Maggiore deve darne tempestiva comunicazione scritta alla controparte.

1.5. Le Parti convengono che, qualora l'esecuzione del contratto di vendita diventi eccessivamente onerosa per il Venditore a causa di aumenti di costi o altri eventi straordinari e imprevedibili al momento della stipula del contratto, e che tali eventi siano al di fuori del controllo del Venditore, quest'ultimo potrà richiedere la rinegoziazione del contratto, al fine di ripristinare l'equilibrio contrattuale originario, o la risoluzione dello stesso.
A tal fine, si considerano eventi straordinari e imprevedibili, a titolo esemplificativo e non esaustivo, le seguenti circostanze: variazioni significative dei prezzi di materie prime, variazioni significative dei prezzi delle utenze, eventi bellici, catastrofi naturali, ecc. Il Venditore dovrà tempestivamente comunicare all'altra Parte l'evento sopravvenuto e la propria intenzione di avvalersi della clausola, fornendo prova dell'esistenza e dell'impatto dell'evento. Le Parti si impegnano a collaborare lealmente per trovare una soluzione che consenta la prosecuzione del contratto a condizioni eque, ovvero, in caso di impossibilità, a procedere alla risoluzione del contratto.

2. RESA E TERMINI DI SPEDIZIONE E CONSEGNA

2.1. Salvo patto contrario, che dovrà risultare dalla conferma dell'ordine, la fornitura dei Prodotti deve intendersi Franco Fabbrica del Venditore (resa "Ex Works").

2.2. Salvo specifiche richieste da concordare prima della Conferma d'Ordine, il Venditore non garantisce che l'ordine del singolo articolo venga evaso tutto con un medesimo lotto di produzione.

2.3. I termini di consegna sono da intendersi indicativi e la proroga di essi non può far maturare all'Acquirente alcun diritto a richiedere indennizzi, ogni eccezione rimossa.

2.4. Se, trascorsi 14 (quattordici) giorni dalla data di avviso di merce pronta, l'Acquirente non ritira il materiale, il Venditore sarà costretto per ragioni di spazio a riportare il materiale a magazzino sostenendo costi supplementari; il Venditore si riserva espressamente di addebitare tali costi all'Acquirente.
Limitatamente ai Prodotti "fuori standard", quindi prodotti su misura, a marchio "ATLAS CONCORDE HABITAT", l'Acquirente ha tempo 40 giorni dall'avviso di merce pronta per provvedere al ritiro del prodotto; trascorsi 40 giorni senza l'avvenuto ritiro da parte dell'Acquirente, il Venditore manterrà il prodotto ancora a disposizione dell'Acquirente per un ulteriore periodo di 20 giorni, trascorsi inutilmente i quali il contratto si intenderà risolto, con diritto del Venditore al risarcimento dei danni quantificati fin da ora, a titolo di penale, nell'importo del prezzo di vendita del prodotto, con espressa rinuncia dell'Acquirente a chiederne la riduzione.

2.5. È compito dell'Acquirente incaricare il vettore di controllare i Prodotti prima del carico ed eventuali osservazioni relative all'integrità degli imballi ed alla corrispondenza delle quantità caricate a quelle indicate nel documento di trasporto dovranno essere segnalate all'atto del carico e riportate su tutte le copie del documento di trasporto; in assenza di tali annotazioni i Prodotti caricati si intendono integri e completi.

2.6. È altresì responsabilità dell'Acquirente incaricare il vettore di verificare che il mezzo sia idoneo al carico in relazione alla natura dei Prodotti e di verificare le modalità e la stabilità del carico affinché durante il trasporto non si verifichino rotture, ed affinché siano rispettate tutte le disposizioni di sicurezza riguardante la circolazione stradale dell'automezzo.

2.7. La Direttiva 2006/112/CE stabilisce che l'azienda che venda beni aventi destinazione all'interno dell'Unione Europea ad un'altra azienda con sede in uno Stato membro non sia tenuta all'applicazione dell'IVA; allo stesso tempo, però, il Regolamento di esecuzione UE 2018/1912, richiede all'azienda cedente la prova dell'avvenuta ricezione dei beni nel Paese di destinazione che deve essere ottenuta entro 90 giorni dalla consegna. Il Venditore, in conformità alle normative sopracitate, fatturerà agli Acquirenti aventi sede in uno Stato membro UE la merce destinata all'interno della UE senza applicazione di IVA, chiedendo però ai propri Acquirenti la massima collaborazione e, dunque, la sottoscrizione della Dichiarazione di avvenuta ricezione delle merci entro i termini previsti. Qualora l'Acquirente non restituisse entro 90 giorni dalla vendita la Dichiarazione firmata, il Venditore sarà costretto a riaddebitargli l'IVA tempo per tempo vigente in Italia calcolata sul valore della merce ceduta e sui relativi oneri accessori. Si ricorda che la richiesta di firma della Dichiarazione sopraindicata viene inviata da Ceramiche Atlas Concorde Spa tramite il sistema di firma elettronica di AdobeSign, e l'Acquirente è tenuto ad applicare la propria firma utilizzando tale modalità.

3. CARATTERISTICHE DEI PRODOTTI

3.1. Il Venditore dichiara che i Prodotti sono conformi alle norme italiane e comunitarie di settore ad essi applicabili.

3.2. Il Venditore garantisce soltanto le caratteristiche tecniche pubblicate sul sito internet nel documento: Schede Tecniche (ai link https://www.atlasconcorde.com/it/download-area e https://www.atlasplan.com/it/download/).

3.3. L'indicazione d'uso proposta dal Venditore è comunque da ritenersi indicativa perché **è sempre compito dell'Acquirente valutare l'idoneità del prodotto alle condizioni specifiche di utilizzo in funzione delle sollecitazioni e delle variabili che si possono verificare nell'ambiente di destinazione alterandone le sue caratteristiche,** a titolo d'esempio, all'intensità del traffico, alla qualità del traffico (calpestio in presenza di sabbia, di detriti...), alle eventuali condizioni climatiche avverse e a qualsiasi altra situazione concreta a cui può essere esposto il materiale. **Una destinazione d'uso diversa e/o non compatibile con le indicazioni del Venditore specificate sui suoi Cataloghi Generali presenti al seguente link** https://www.atlasconcorde.com/it/download-area, ovvero con le condizioni specifiche di utilizzo, n**on potranno in alcun modo integrare un difetto di qualità e/o di conformità del prodotto, con conseguente esclusione di qualsiasi garanzia convenzionale e/o legale.**

3.4. Le rappresentazioni e/o immagini riguardanti i Prodotti riportate in siti internet, brochure, cataloghi, listini prezzi o documenti similari del Venditore hanno valore indicativo ed illustrativo. Allo stesso modo i campioni e modelli rappresentano solo indicativamente le caratteristiche dei Prodotti e non hanno valore impegnativo per il Venditore se non nella misura in cui siano espressamente menzionati nella conferma d'ordine come caratteristiche e/o qualità essenziali del prodotto. **La vendita si intende quindi effettuata "su Tipo di Campione", e non "su Campione".**

4. RECLAMI E GARANZIA PER VIZI

4.1. Al ricevimento dei Prodotti, l'Acquirente dovrà sottoporli ad accurato controllo, ivi compreso l'imballo, attraverso un esame visivo effettuato conformemente alle indicazioni riportate al punto 9 delle norme UNI EN ISO 10545-2. Il collaudo della superficie piastrellata prima della posa consiste in un esame visivo (ad occhio nudo o con occhiali se normalmente indossati) della superficie da una distanza di 1,0 metri in posizione verticale, ovvero in un esame tattile, ove necessario.

4.2. Fatti salvi i limiti di accettabilità previsti dalla norma internazionale EN 14411 (ISO 13006), le Parti riconoscono come Vizi Palesi i difetti dei Prodotti riscontrabili già al momento del loro ricevimento tali da rendere il materiale inidoneo all'uso o da diminuirne in modo apprezzabile il valore, a titolo esemplificativo e non esaustivo:

- difetti superficiali;
- difetti di decorazione (gocce, macchie, toni mescolati, fuori tono...etc.);
- difetti dimensionali (calibro, planarità, spessore, ortogonalità-rettilineità degli spigoli);
- difetti strutturali (crepe, sbeccature...etc.).

Vengono invece identificati quali Vizi Occulti, a titolo esemplificativo e non esaustivo:

- crepe ortogonali ai bordi o crepe superficiali dopo l'installazione ("esfoliazione"), non attribuibili ad una scorretta attività di taglio e posa successive alla vendita;
- macchiabilità, ossia Prodotti che trattengono in modo anomalo lo sporco e risultano essere di difficile pulibilità, non attribuibile ad una scorretta installazione e/o manutenzione;
- differenze di brillantezza, ossia Prodotti che in condizione di luce radente riflettono la luce in modo differente rispetto a quelli adiacenti, il cui effetto non era voluto e non era riscontrabile all'esame visivo e/o tattile.

4.3. La garanzia del Venditore viene prestata solo nel caso in cui i vizi e difetti siano imputabili al processo di fabbricazione del prodotto ma è da ritenersi del tutto esclusa se derivante dalla lavorazione del prodotto stesso intendendosi per tale, a titolo non esaustivo, qualsiasi attività di sagomatura, foratura e taglio delle piastrelle o delle lastre e/o qualsiasi attività necessaria alla loro utilizzazione, salvo che tanto la posa quanto la lavorazione avvengano attenendosi scrupolosamente alle raccomandazioni inerenti le attività da svolgere prima e durante la posa in opera indicate nel documento relativo ai suggerimenti di Posa, Uso, Pulizia e Manutenzione contenuto nel sito del Venditore al seguente link (https://www.atlasconcorde.com/it/download-area, sezione "Schede Tecniche") nonché alla regola d'arte e, nonostante ciò, i vizi si manifestino.
I suggerimenti di Posa, Uso e Manutenzione dei prodotti a marchio "Atlas Plan" potranno essere richiesti direttamente al Venditore o scaricati attraverso il QR code indicato sull'etichetta presente sul Prodotto.

4.4. La garanzia è limitata ai soli Prodotti di prima scelta, e, a pena di decadenza dalla garanzia, i Vizi Palesi della merce devono essere denunciati entro 8 (otto) giorni dalla consegna, mentre i Vizi Occulti devono essere denunciati entro 8 (otto) giorni dalla scoperta, e la relativa azione si prescrive in un anno dalla consegna.

4.5. Nel caso l'Acquirente rilevi Vizi Palesi dovrà tenere a disposizione del Venditore l'intera partita di materiale.

4.6. Nel caso risulti accertato che il Prodotto manifesti **Vizi Palesi**, come definiti al punto 4.2., **il Venditore provvederà alla sostituzione del Prodotto difettoso con altro avente caratteristiche pari o superiori, o nel caso ciò non sia possibile ad una congrua riduzione del prezzo. In alternativa l'Acquirente avrà diritto, previa restituzione dei Prodotti viziati, al rimborso del prezzo pagato, maggiorato del costo del trasporto, con esclusione del risarcimento di ogni altro danno diretto e/o indiretto.**

4.7. La garanzia del Venditore deve ritenersi esclusa nel caso in cui il Prodotto affetto da Vizi Palesi (in tutto o in parte) sia stato posato e/o utilizzato e/o comunque trasformato. **In tal caso il comportamento dell'Acquirente (ossia la posa e/o l'utilizzo e/o la trasformazione) costituisce accettazione del Prodotto nello stato in cui si trova; il Venditore pertanto non accetta reclami per Prodotti già installati e/o trasformati e/o utilizzati, costituendo questo implicita accettazione del Prodotto.**

4.8. Nel caso risulti accertato che il Prodotto manifesti **Vizi Occulti**, come definiti al punto 4.2., **la garanzia del Venditore è limitata alla sostituzione del materiale con altro avente caratteristiche pari o superiori, e ove ciò non sia possibile al rimborso del prezzo pagato maggiorato del costo del trasporto. In ogni caso la garanzia del Venditore per ogni danno diretto e/o indiretto comunque originato dal prodotto difettoso, deve intendersi limitata ad una somma che non potrà superare il doppio del prezzo di vendita applicato dal Venditore in relazione alla sola parte della fornitura difettosa.**

4.9. Nel caso l'Acquirente rivenda il Prodotto a soggetti tutelati dal codice del consumo (d.l. n.206/2005) sarà responsabile delle condizioni praticate se difformi da quelle qui riportate e dovrà accertarsi che i diritti del consumatore siano esercitati nel rispetto dei rimedi e dei termini fissati da tale codice. Nel caso sussistano i presupposti, il diritto di regresso e/o comunque di rivalsa spettanti all'Acquirente verso il Venditore/produttore non potrà eccedere le esenzioni ed i limiti come fissati dai p.ti che vanno dal 3.2. al 4.8. e ai p.ti 4.10., 4.11. e 4.12..

4.10. Prima di movimentare i Prodotti l'Acquirente dovrà verificare l'integrità dell'imballaggio e la sua tenuta. **Per particolari tipologie di imballo** (ad esempio gli "Elementi per l'imballaggio di almeno una lastra", quali l'imballaggio "Atlas Concorde Pack", oppure l'imballaggio "EasyPack") **l'Acquirente dovrà attenersi scrupolosamente alle istruzioni ed avvertenze per la movimentazione e l'utilizzo riportate sullo stesso e sul sito internet al link https://lc.cx/dzwelC.** Il Venditore non risponde di eventuali danni dovuti al mancato rispetto delle istruzioni, e/o avvertenze, ovvero da un utilizzo non conforme.

4.11. L'utilizzo degli imballi "Elementi per l'imballaggio di almeno una lastra", quali l'imballaggio "Atlas Concorde Pack", oppure l'imballaggio "EasyPack", **è riservato esclusivamente ai Prodotti del Venditore.**

4.12. L'utilizzo e la movimentazione dei Prodotti deve avvenire nel rispetto delle istruzioni del Venditore e di tutte le normative applicabili, con particolare riguardo a quella sulla sicurezza. L'utilizzo e/o la lavorazione e/o la movimentazione incauti e/o scorretti e/o senza adottare le necessarie precauzioni e/o misure di sicurezza può causare gravi danni a persone e\o cose.

5. PAGAMENTI

5.1. Per nessun motivo, ivi compresi pretesi vizi o difetti del materiale, l'Acquirente potrà sospendere o ritardare il pagamento del materiale ritirato, salva naturalmente la facoltà di richiedere quanto possa dimostrare di avere indebitamente pagato.

5.2. Ad ogni effetto di legge il pagamento deve avvenire solo ed esclusivamente presso la sede del Venditore, salvo espressa deroga scritta.

5.3. È esclusa la compensazione di quanto dovuto al Venditore con asseriti crediti contestati e/o non espressamente riconosciuti per iscritto.

6. LINGUA DEL CONTRATTO, LEGGE APPLICABILE, GIURISDIZIONE E COMPETENZA

6.1. Il Contratto e le presenti Condizioni sono redatti in lingua Italiana, la quale prevarrà nel caso di divergenza con la traduzione in altre lingue.

6.2. La definizione di qualsiasi controversia comunque relativa alle forniture è soggetta alla legge e alla giurisdizione dello Stato Italiano.

6.3. La competenza territoriale per la definizione di qualsiasi controversia comunque relativa alle forniture viene devoluta in via esclusiva al Tribunale di Modena, con esclusione di ogni altro.

L'Acquirente conferma che le condizioni generali sopra riportate sono state negoziate con il Venditore e dichiara di averle lette e di approvare specificatamente quelle relative alle modalità di conclusione del contratto (sub 1.3.), ai reclami e garanzia per vizi (sub 4.6. e 4.8.), ai pagamenti (sub 5.1.) ed alla lingua del contratto, legge applicabile, giurisdizione e competenza (sub 6.3.).

*Le Condizioni Generali di Vendita (CGDV) sono soggette ad aggiornamenti e/o modifiche; è pertanto necessario verificare sul nostro sito (**www.atlasconcorde.com**) e/o sulla conferma d'ordine la versione aggiornata delle CGDV in vigore tempo per tempo.*

Atlas Concorde reserves the right to modify any product without notice and will not be liable for any direct or indirect damage resulting from such modifications.
Atlas Concorde si riserva di modificare i prodotti senza preavviso, declinando ogni responsabilità su eventuali danni diretti o indiretti derivanti da eventuali modifiche. - Atlas Concorde se réserve le droit de modifier ses produits sans préavis et décline toute responsabilité concernant les éventuels dommages directs ou indirects qui pourraient dériver de ces modifications - Atlas Concorde behält sich das Recht vor jederzeit und ohne vorherige Ankündigung, die Produkte zu verändern, und lehnt jede Haftung bei direkten oder indirekten Schäden ab, die von diesen Veränderungen herrühren - Atlas Concorde se reserva el derecho de modificar los productos sin previo aviso, rechaza cualquier responsabilidad sobre eventuales daños directos o indirectos derivados de eventuales modificaciones -
Atlas Concorde оставляет за собой право изменять характеристики изделий без предварительного уведомления, отклоняя при этом любую ответственность за прямые или косвенные убытки, возникшие в результате изменений.

Colours and optical features of the materials illustrated in this catalogue are to be regarded as mere indications.
I colori e le caratteristiche estetiche dei materiali illustrati nel presente catalogo sono da ritenersi puramente indicativi. - Les coloris et les caractéristiques esthétiques des références illustrées dans le catalogue sont donnés à titre purement indicatif - Die Farben und die ästhetischen Eigenschaften der in diesem Katalog abgebildeten Produkte sind als reine Richtwerte zu betrachten - Los colores y las características estéticas de los materiales ilustrados en el presente catálogo deben ser considerados como puramente indicativos - Цвета и эстетические характеристики описанных в настоящем каталоге материалов являются только ориентировочными.

For information and details relating to codes, packaging and weight it is recommended to refer to the latest pricelist.
Per le informazioni e i dati relativi a codici, imballaggi e pesi occorre sempre consultare l'ultimo listino aggiornato e in vigore. - Pour toutes informations et renseignements concernant les codes, les emballages et les poids, il y a toujours lieu de consulter le dernier tarif en vigueur et mis à jour - Für Informationen und Daten die den Code, die Verpackung und das Gewicht betreffen bitte die aktuellste Preisliste zugrunde legen - Para acceder a la información y a los datos relativos a códigos, embalajes y pesos hay que consultar siempre la última lista de precios actualizada y vigente - Для информации о кодах, упаковках и весе обращайтесь к последнему действующему прайс-листу.

Ceramic products can have slight variations in tone. Check with the sales representative for the possibility of combining production lots, formats, decorations and special pieces.
Il prodotto ceramico può essere leggermente variabile in termini di toni. Verificare con il referente commerciale l'abbinabilità sia tra i lotti produttivi che tra i formati e i decori o i pezzi speciali. - Le produit céramique peut légèrement différer sur l'aspect de la couleur. Vérifier avec le référent commercial que l'assortiment soit entre les lots de fabrication qu'entre les formats et les décors ou les pièces spéciales - Im keramischen Produkt sind Abweichungen von Farbton möglich. Wenden Sie sich bitte an den Verkaufsleiter, um zu überprüfen, wie man die verschiedenen Posten, Formate, Dekore oder Spezialteile miteinander kombinieren kann - El producto cerámico puede variar levemente en lo que respecta a los tonos. Consulte con el representante de ventas la combinación entre los lotes producidos y entre los formatos y las decoraciones o las piezas especiales - Керамические изделия разных партий могут слегка отличаться по тону. Проверьте вместе с торговым представителем сочетаемость с изделиями других партий, а также с форматами, декоративными или специальными элементами.

The production sizes of special pieces in porcelain tiles may vary from the nominal sizes provided for in current standards (ISO 13006 - EN 14411 Annex G) for non-modular tiles.
Le dimensioni di fabbricazione dei pezzi speciali in gres porcellanato possono derogare dalle dimensioni nominali previste dalle normative vigenti (ISO 13006 - EN 14411 appendice G) per le piastrelle non modulari. - Les dimensions de fabrication des pièces spéciales en grès cérame peuvent déroger aux dimensions nominales prévues par les règlements en vigueur (ISO 13006 - EN 14411 annexe G) pour les carreaux non modulaires. | Die Produktionsmaße der Formteile aus Feinsteinzeug können für die nicht modularen Fliesenformate von den Sollmaßen der geltenden Normen (ISO 13006 - EN 14411 Anhang G) abweichen. - Los tamaños de fabricación de las piezas especiales de gres porcelánico pueden ser diferentes de las dimensiones nominales previstas por las normas vigentes (ISO 13006 - EN 14411 apéndice G) para las baldosas no modulares. - Производственные размеры специальных элементов из керамогранита могут отклоняться от номинальных размеров, предусмотренных действующими стандартами (ISO 13006 - EN 14411, Приложение G) для немодульных плиток.

The actual dimensions of the special pieces and the smaller pieces obtained by cutting porcelain tiles could deviate from the tolerances in the catalog, which instead for the rectified formats are guaranteed by Atlas Concorde.
Le dimensioni reali dei pezzi speciali e dei sottoformati ottenuti da tagli in gres porcellanato potrebbero derogare rispetto alla tolleranze presenti a catalogo garantite da Atlas Concorde sui formati rettificati. - Les dimensions réelles des pièces spéciales et des sous formats obtenus à partir des coupes en grès cérame pourraient varier par rapport aux tolérances présentes au catalogue garanties par Atlas Concorde sur les formats rectifiés. - Die tatsächlichen Abmessungen der Formstücke und der geschnittenen Unterformate aus Feinsteinzeug können von den im Katalog genannten, von Atlas Concorde für rektifizierte Formate garantierten Toleranzen abweichen. - Las dimensiones reales de las piezas especiales y de los subformatos obtenidos por cortes de gres porcelánico, podrían no cumplir con las tolerancias indicadas en el catálogo, garantizadas por Atlas Concorde para los formatos rectificados. - Фактические размеры специальных элементов и подформатов, полученных путем разрезания керамогранита, могут отклоняться от допусков, указанных в каталоге и гарантируемых компанией Atlas Concorde для ретифицированных форматов.
