VERSATILITY!

- COMPACT SIZE**
 The three-pole 16A to 63A switch disconnectors, are made up of a single unit body, merely 36mm/1.42" wide, while the 63A to 160A ratings, of another body size of only 70mm/2.75" wide.
- ACCESSORY FLEXIBILITY**
 Mounting and removal of the fourth pole and add-on blocks are simple and quick operations with no need for tools.
- VERSIONS FOR PHOTOVOLTAIC APPLICATIONS**
 The GA... and GD type switch disconnectors are suitable for both small domestic installations as well as those with a large number of solar cells. Use up to 1000V in DC21B category.

- CERTIFICATIONS**
 The 16A to 63A types are listed for Canada and the USA, certified according to UL508/CSA C22.2 n° 14. The 63A to 125A types are listed for Canada and the USA, certified according to UL98A/CSA C22.2 n° 4.

- SIDE MOUNT ADD-ON FOURTH POLE**

Simultaneous closing or early-make contact operation of the fourth pole with respect to the switch disconnector poles.

- ADD-ON AUXILIARY CONTACTS**

Only one add-on block suitable for all the 9 ratings of switch disconnectors, having simultaneous closing with the switch disconnector poles. There are versions with an early-break NO contact with respect to the switch disconnector.

- MAXIMUM COMBINATIONS**

Mounting up to 4 auxiliary contacts or 1 fourth pole and 3 auxiliary contacts (2 blocks always on the right and 2 on the left side) of each switch disconnector. The earth and neutral terminals and fuse holder also can be added.

- DOOR COUPLING HANDLE WITH FRONT DIMENSIONS 48X48MM**

The GAX68 and GAX68B handles can be used in panels and boxes of limited dimensions.

- 6 AND 8 POLE VERSION**

Mechanical coupling systems are available for the 16A to 160A switch disconnectors with direct operating handle to provide 6/8 pole disconnectors or a mechanical interlock mechanism for the line changeover function (I - 0 - II). The enclosed switches are cULus certified.

- FUSE HOLDERS**

A three-pole fuse holder can be added to 16A to 32A switch disconnectors, with direct operating handle, to provide a single compact unit. Access to the fuse can be made only when the disconnector is in OFF position.

- REDUCED HANDLE THICKNESS**

GAX61 and GAX 61 B handles are only 23mm thick.

- IP65 PADLOCKABLE HANDLES**

Wide range of selector or pistol grip handles, with screw or ring fixing. All handles are equipped with built-in padlockable mechanism. The selector handle GAX63... snaps onto the door mount switch disconnectors in 16A to 40A ratings, with no need for tools.

- HANDLE ADAPTABILITY**

The extensive number of fixing holes in the front handle plate can replace switch disconnectors, normally found out in the field, without having to drill others.

- UL508A HANDLE VERSION**

In compliance with UL508A standards, which require internal panel inspection by authorised personnel with power applied, selector and pistol handles are available with defeatable feature of the door coupling when the switch disconnector is closed, i.e. in ON position.

- SWITCH STATUS INDICATION**

The switch open or closed state is clearly and unequivocally seen at a distance thanks to the simple and modern design of the handles.

- DIN RAIL FIXING**

Switch disconnector mounting on and removal from the 35mm DIN rail are done by simply pressing it downwards with no need for tools.

- ANTI-SLIDE INSERT FOR DIN RAIL**

A rubber pad insert prevents the sliding of switch disconnectors on the DIN rail even when out of tolerance or mounted vertically.

- TERMINAL ADAPTABILITY**

Terminals are suitable to accept any type of cable: flexible, rigid, AWG wire. The terminals can withstand high tightening torques.

- HIGH IEC CAPABILITY IN AC23**

The rated currents I_n in AC23 at 690VAC are the highest of the category.

- MODULARITY**

The switch disconnectors can be mounted in modular panels.

MOUNTING POSITION

The performances, given in this catalogue, have been established with GE series switch disconnectors mounted on a vertical place with line terminals facing upwards and load terminals facing downwards.

All GE series switch disconnectors can be mounted as illustrated in the following figures without any derating except for position A. It is not recommended to mount switch disconnectors with the neutral pole facing downwards.

I Special assembly. Contact our Customer Service office (Tel. +39 035 4282422; E-mail: service@LovatoElectric.com) for details.
