Tub flexibil ondulat

Tub flexibil ondulat din PVC

Flexible corrugated pipe

Standard de fabricatie: SR EN 50086-1
SR EN 50086-2-3

Domeniul de utilizare:

Tuburile flexibile ondulate nemetalice si nefiletate se utilizeaza la pozarea cablurilor si conductoarelor electrice sau sistemelor de telecomunicatie pan ala 1000 V c.a. si/sau 1500 V c.c.

Culoare:

Tuburile care nu propaga arderea pot sa aiba orice culoare cu exceptia culorilor: portocaliu, galben sau rosu.

Aceste culori sunt rezervate tuburilor care propaga arderea.

Diametrele pentru tuburile flexibile ondulate trebuie sa fie cf. tabelului.

Manufacturing standard: SR EN 50086-1
SR EN 50086-2-3

Applications: the non-metalic flexible corrugated pipes serve to laying electric cables and conductors in electrical ar telecommunication systems to 1000 vac and/or 1500 DC.

Color:

The pipes that are not flame propagating may bear any color except orange, yellow or red.

These colors are designated for flame propagating tubes exclusively.

The diameters of the corrugated flexible tubes must comply with the table below:

Diametru exterior tub Pipe outer diameter mm ²	Abatere Tolerance mm ²	Diametru interior tub Pipe inner diameter mm ²
20	+0.3/-0.3	14.1
21	+0/-0.3	16.6
25	+0/-0.4	18.3
32	+0/-0.4	24.3
34	+0/-0.4	29.0
